10 Bone Reduction Forceps 8" Long Ratchet with Gold Plated Handle

$179.99 per piece

Trade price from **$165.59**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 10 Bone Holding Reduction Forceps 8 Inches Curved Jaws Pointed Tips with Long Ratcheted Finger Ring Gold Plated Handles Stainless Steel Surgical Orthopedic Instrument.

The bone reduction forceps with curved tips allow the gripping of denser and deeper bones. Reduction forceps assist in grasping dense bones located in deeper regions. These Bone Reduction Forceps also helpful for the soft tissue attachment intended to reduce distal radius fractures.

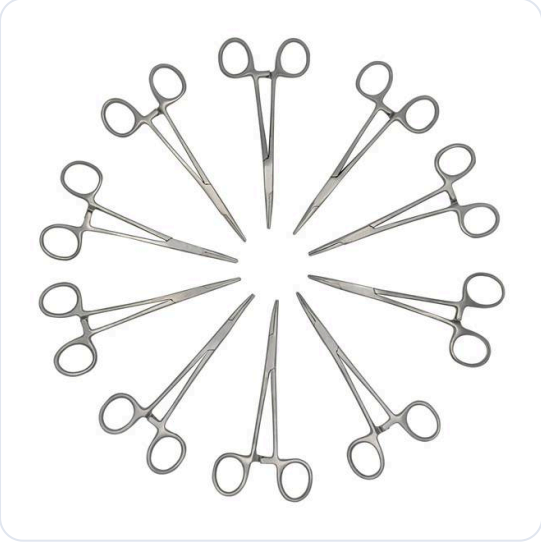

The instrument aids in the alignment and setting of bone fractures while firmly holding them. The ergonomic design of the forceps allows precision and reduces the chances of fracture during the surgical procedure. These forceps are available in different variations. The long ratchet mechanism gives a precise performance during bone manipulation.

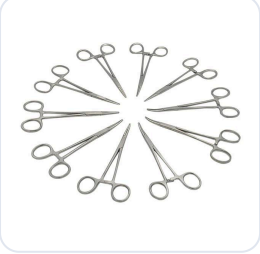

BONE REDUCTION FORCEPS FEATURES:

- Minimal damage during the surgical procedure
- Precise Curved Tips
- 2" Ratchet that allows opening of the Jaws up to 4"
- Self Retaining Gold Plated Finger Ring Handles
- Size and tip variations are available
- German Grade Stainless Steel Finish

PACKAGE INCLUDE:

- 10 Pcs Bone Reduction Forceps 8" Ratchet Length: 2" Opens to 4" with Gold Plated Ring Handles

10 Pcs Pack of Hartman Mosquito Hemostat Locking Forceps Set Kit, 5 Pieces Curved & 5 Pieces Straight Instruments Tools, 3.5-Inch (8.9cm). High Quality Stainless Steel Multipurpose Hemostats for Nurses, Fishing Forceps, Crafts and Hobby

Hartmann Mosquito forceps feature fine tips, short, and fully serrated jaws, these Hartmann Mosquito Forceps can be used as a clamping instrument to halt blood flow so that cauterization or ligation can be performed. Hartmann Mosquito Forceps are used as both a hemostat and for fine tissue dissection in shallow wounds and procedures. They are also used for holding small, fine sutures. Hartmann Mosquito Forceps are shorter and heavier than Halsted Mosquito Forceps.

HARTMANN MOSQUITO FORCEPS FEATURES

10 PCS MOSQUITO FORCEPS SET: 3.5" Straight Curved Hartman Mosquito Forceps are used as both a hemostat and for blunt tissue dissection. This Curved forceps are only 3.5" long, making them easy to work with in tight spaces. Ratcheted handles can be locked in multiple positions in order to maintain variable levels of constant pressure. Delicate hemostats have thin jaws with fine serrations
THREE LOCKING POSITIONS: The high grip and locking ratchet mechanism reduce the possibility of the vessels or collection of tissues sliding or moving during use. This hemostat has handles that can be held in place by a locking mechanism. The locking mechanism

Pack of 10 Laborde Tracheal Dilator Forceps 5.5" (14cm) Non-Ratcheted, Single-Spring Finger Ring Gold Handle Dilator with Three Blades ENT Tracheostomy Stainless Steel Surgical Instruments

Laborde Tracheal Dilator Forceps is an incredible surgical instrument assists surgeons to make critical tracheotomy incisions in order to treat upper airway obstructions. The device helps dilate or widen the trachea and facilitate for easy tube insertion and placement. In tracheotomy, surgeons make an opening in the anterior wall of the trachea to bypass obstructions in the upper airways or to manage chronic breathing problems.

Laborde Tracheal Dilator helps to widen the trachea and facilitate tube insertion with ease. This prevents damaging the back of the airways with sharp force. The large finger rings prevent accidental slips and injuries. The unique three prongs design with round tips to control the tissue separation and make a uniform opening. The blunt tips also avoid tracheal tears and injury. Moreover, the jaws have narrow angled necks so you can view the working tips clearly

LABORDE TRACHEAL DILATOR FEATURES

- Finger Ring Gold Handles for Controlled Movements.
- Three prongs to ensure uniform tissue separation.
- Angled Jaws for Easy Surgical Access.
- Blunt Prongs for Safe Manipulations

Pack of 12 Jansen Ear Dressing Forceps 6.25" (15.9cm) Bayonet Style Serrated Tips ENT Medical Otology Surgical Instruments

Jansen ear forceps are bayonet grasping devices that ear doctors use for aural procedures, like inserting gauze packs and removing foreign bodies. Jansen ear forceps assist doctors to treat ear diseases. Doctors use these forceps to remove foreign bodies that close the ear canal.

The shaft is long in order to improve access into deep spaces. Moreover, the bayonet design gives a more direct vision of the jaws for accuracy. The serrations on the handles offer a steadfast grip. On the other hand, the serrations in the jaws hold a wide range of materials securely. We manufacture ear forceps from the finest class of stainless steel that you can depend on for years of efficient performance.

JANSEN EAR FORCEPS FEATURES

- Bayonet Design For Optimal Accuracy.
- Serrated Handles For Non-slip Grips.
- Long Slender Jaws For Deep Access.
- Lightweight
- Made with High Quality Stainless Steel

Pack of 2 Laborde Tracheal Dilator Forceps 5.5" (14cm) Non-Ratcheted, Single-Spring Finger Ring Gold Handle Dilator with Three Blades ENT Tracheostomy Stainless Steel Surgical Instruments

Laborde Tracheal Dilator Forceps is an incredible surgical instrument assists surgeons to make critical tracheotomy incisions in order to treat upper airway obstructions. The device helps dilate or widen the trachea and facilitate for easy tube insertion and placement. In tracheotomy, surgeons make an opening in the anterior wall of the trachea to bypass obstructions in the upper airways or to manage chronic breathing problems.

Laborde Tracheal Dilator helps to widen the trachea and facilitate tube insertion with ease. This prevents damaging the back of the airways with sharp force. The large finger rings prevent accidental slips and injuries. The unique three prongs design with round tips to control the tissue separation and make a uniform opening. The blunt tips also avoid tracheal tears and injury. Moreover, the jaws have narrow angled necks so you can view the working tips clearly

LABORDE TRACHEAL DILATOR FEATURES

- Finger Ring Gold Handles for Controlled Movements.
- Three prongs to ensure uniform tissue separation.
- Angled Jaws for Easy Surgical Access.
- Blunt Prongs for Safe Manipulations

Pack of 3 Pcs Hartman Alligator Ear Forceps 3.5'', 5.5'' & 6.5''" Stainless Steel Set Surgical ENT Diagnostic Instruments

Alligator Ear Forceps are a non-ratcheted, finger ring, ENT instrument commonly used for debridement and removing debris from the ear. These forceps are named after the German physician Arthur. These Ear Forceps used for removing foreign bodies. A common name also is "Crocodile forceps". Alligator forceps are surgical instruments that are great for grasping small objects or removing items from small cavities in the body.
The instrument has a long shaft that is set at a 45-degree angle to the grip, and a small set of serrated jaws at the tip. The jaws bear resemblance to the snout of an alligator, giving rise to the name of the tool. When not in use, the serrated jaws remain open and only close when the handles are squeezed. This function allows for the forceps to be inserted into a small cavity, partially open, and to then be closed on a lodged object, holding the object with a consistent application of pressure. The ability to fine tune the amount of pressure applied, combined with the long reach of the tool, makes the forceps ideal for removing foreign bodies or for moving sterile dressings in a hard-to-reach area after surgical procedures. This instrument is made from Premium Stainless Steel that is tarnish free, corrosion resistant and fully autoclavable. Very easy to clean and re use in the clinical environment.

Pack of 3 Jansen Ear Dressing Forceps 6.25'' (15.9cm) Bayonet Style Serrated Tips ENT Medical Otology Surgical Instruments

Jansen ear forceps are bayonet grasping devices that ear doctors use for aural procedures, like inserting gauze packs and removing foreign bodies. Jansen ear forceps assist doctors to treat ear diseases. Doctors use these forceps to remove foreign bodies that close the ear canal.

The shaft is long in order to improve access into deep spaces. Moreover, the bayonet design gives a more direct vision of the jaws for accuracy. The serrations on the handles offer a steadfast grip. On the other hand, the serrations in the jaws hold a wide range of materials securely. We manufacture ear forceps from the finest class of stainless steel that you can depend on for years of efficient performance.

JANSEN EAR FORCEPS FEATURES

- Bayonet Design For Optimal Accuracy.
- Serrated Handles For Non-slip Grips.
- Long Slender Jaws For Deep Access.
- Lightweight
- Made with High Quality Stainless Steel

PACKAGE INCLUDE:

- 3 Pcs Jansen Ear Forceps 5.5'' (14cm) Bayonet Style Serrated Tips

In tracheotomy, surgeons make an opening in the anterior wall of the trachea to bypass obstructions in the upper airways or to manage chronic breathing problems.

Laborde Tracheal Dilator helps to widen the trachea and facilitate tube insertion with ease. This prevents damaging the back of the airways with sharp force. The large finger rings prevent accidental slips and injuries. The unique three prongs design with round tips to control the tissue separation and make a uniform opening. The blunt tips also avoid tracheal tears and injury. Moreover, the jaws have narrow angled necks so you can view the working tips clearly

LABORDE TRACHEAL DILATOR FEATURES

- Finger Ring Handles for Controlled Movements.
- Three prongs to ensure uniform tissue separation.
- Angled Jaws for Easy Surgical Access.
- Blunt Prongs for Safe Manipulations

8-inch Surgical Cheatle Forceps Stainless Steel Serrated

$4.00 per piece

Trade price from **$2.00**
Minimum order 3 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

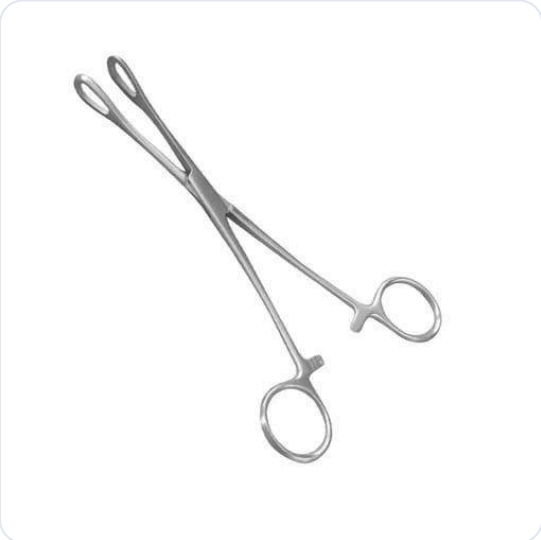

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

8-inch Surgical Cheatle Forceps Stainless Steel Serrated — one of 4,770 instruments we manufacture ourselves rather than buy in. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them. The name tells you what you are getting: serrated jaws for grip that does not slip under tension.

The 8″ size shown is our standard; other sizes in the same pattern are made to order. Every piece is hand-finished and inspected before it leaves the bench: joint action, tip alignment and surface finish are checked on each unit, not on a sample. Listed at $4.00, falling to $2.00 at 3 pieces — about 50% off the single-unit price.

Larger quantities are priced on request. Samples go out on request so you can check the steel and the finish before you place a real order.

Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

9.5" Stainless Steel Forceps is part of our surgical instruments range, produced start to finish at our Sialkot facility. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them.

Forging, milling, heat treatment, hand finishing and passivation all happen under one roof, which is why we can change a dimension or a finish without a tooling charge. Listed at $3.00, falling to $1.50 at 1 piece — about 50% off the single-unit price.

Larger quantities are priced on request. Order it on its own or as part of a mixed shipment; we do not insist on a full container.

92 PCS Open Heart Surgery Instrument Set

$320.00 per piece

Trade price from **$300.00**
Minimum order 1 set

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

ABOUT THIS INSTRUMENT

This is our pattern of 92 PCS Open Heart Surgery Instrument Set, made for general and specialty operating theatre use. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them. Supplied as a 92-piece set.

We can add, drop or substitute items so the tray matches your protocol rather than ours. We work the instrument by hand at the finishing stage — box locks, hinges and tips are set individually, which is what separates a good instrument from a cheap one. Listed at $320.00, falling to $300.00 at 1 set — about 6% off the single-unit price.

Larger quantities are priced on request. Small trial orders are welcome — most buyers start with a sample or a single carton before committing.

Babcock Intestinal Forceps 10" with 15mm Jaws

$12.99 per piece

Trade price from **$11.95**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Babcock Intestinal Forceps 10" (25.4cm) with 15mm Wide Jaws Stainless Steel Tissue Grasping Laparotomy and Intestinal Surgical Procedure Instrument.

Babcock forceps used for grasping, holding and encircling delicate structures such as ureters, fallopian tubes, bowel, ovaries, and appendix. They are frequently used with intestinal and laparotomy procedures, particularly useful for grasping tube-shaped structures. This instrument features circumferential, rounded edge triangular jaws, which ensure optimal grip on tubular tissues. In addition, the internal surface of the jaws features horizontal serrations for protecting the grasped tissues. When the instrument is closed the ridge fits into the groove securing the held structure from slipping. Babcock intestinal and tissue grasping forceps comes with long shafts for deep surgical access. Also, the ratchet mechanism allows for self-locking the jaws, which enables surgeons to grasp other devices.

Babcock tissue forceps are similar to Allis forceps, though they may be less traumatic due to round and wider grasping surface. The hypogastric connective tissues are perforated lateromedially. Crafted from 100% high-grade German surgical stainless steel and can be reused after sterilization.

BABCOCK INTESTINAL FORCEPS FEATURES:

- Straight Long Shank for Deep Surgical Access.

Baby Mixter Forceps 5.25" (13cm) Curved Serrated Jaws

$8.99 per piece

Trade price from **$8.27**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Baby Mixter Forceps 5.25" (13cm) Right Angled Vertical Serration Jaws with Finger Ring Handle – Premium Quality Stainless Steel Blood Vessels Clamping and Delicate Tissues Dissecting Forceps for Gallbladder, General Surgery, Orthopedic and Gynecological Surgeries.

Mixter hemostatic forceps are versatile surgical instruments designed for effective hemostasis used to clamp blood vessels, control bleeding, and dissect or manipulate delicate tissues. They feature right angled, fully curved, vertical serrated jaws with ring handles. The design enhances maneuverability and provides precise control in delicate procedures, while the serrated jaws ensure a secure grip and minimize slippage. The ratcheted lock ring handle allows for easy handling and accurate pressure control. Baby Mixter Hemostats are smaller than full-sized Mixter hemostats, measuring 13 cm (5.25") long. Made from high-quality stainless steel, mixter forceps are durable and reliable for repeated use.

BABY MIXTER FORCEPS FEATURES

- 5.25 Inches (13 cm) in Length.
- Right Angle Design With Vertical Serration for a Secure Grip.
- Elongated Straight Shafts for Hard-to-reach Surgical Areas.
- Boxlock System for Smooth Joint Movements.
- Ratcheted Mechanism for Self-locking Jaws.

Baby Tischler Rotating Cervical Biopsy Punch Forceps 3x7mm Bite

$79.99 per piece

Trade price from **$73.59**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

High Quality Baby Tischler Cervical Biopsy Punch Forceps 9.75" Oval Shape Tip Up 3mm x 7mm Bite with 360° Rotating Shaft Gold Color Townsend Open Handle OB/GYN Medical Surgical Instrument.

Cervical biopsy is a surgical procedure in which a small amount of tissue is removed from the cervix. During the colposcopy, the clinician looks at the cervix and biopsies any areas that look abnormal. Tischler Biopsy Punch is an OB/GYN instrument used in colposcopy procedures to obtain cervical tissue samples for biopsy.

Rotating Shaft Baby Tischler Biopsy Forceps allows Biopsy to be taken from a hardened Cervix. The oval shape low profile jaw provides better access to the transformation zone when migrating into the Endocervical Canal. Rotating removable shaft complete with pistol grip handle.

ROTATING BIOPSY PUNCH FEATURES

- Stainless steel handle uniquely designed to obtain perfect samples without obstructing biopsy site.
- 360° rotating shaft allows sample collection from most locations while maintaining hand comfort.
- Handle accepts 8 punch styles for total flexibility.
- Ensures a sharp, clean cut reducing Cervical trauma and patient discomfort.

Barnes Neville Obstetrical Forceps 15.5″ (394mm) with Axis Traction Handle

$99.99 per piece

Trade price from **$91.99**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Barnes Obstetric Forceps with Simpson Handle and Neville Axis Traction Rod, 394mm (15.5″) for Obstetrics and Gynaecology Surgical Procedure

Neville Barnes forceps have a cephalic and pelvic curve, and are thus used for delivery of babies presenting as (occipitoanterior) OA. The Barnes Neville Obstetric Forceps have two branches which are to be positioned on the opposite sides of the fetal head. These two opposing branches are called the right and the left. This depends on which side of the woman's pelvis the Neville Barnes obstetrics forceps are going to be applied on.

These forceps are used for low-cavity deliveries. The left blade being put on first followed by the right blade – the baby is then pulled down until the occiput is under the symphysis, then pulled around.

NEVILLE BARNES OBSTETRIC FORCEPS FEATURES

- Cephalic & Pelvic Curve Obstetrical Forceps.
- Useful for Low-Cavity Deliveries.
- Neville Axis Traction Rod.
- Long Plier Grip Style Simpson Handle.
- Ensuring Maximum Control.

PACKAGE INCLUDE:

- 1 Pc BARNES-NEVILLE Obstetrical Forceps with Axis Traction Handle 394mm (15.5″)

Basic Minor Surgery Kit 13-Piece Set

$24.00 per piece

Trade price from **$21.00**
Minimum order 10 sets

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

ABOUT THIS INSTRUMENT

Basic Minor Surgery Kit 13-Piece Set is a forcep we forge, grind and finish in our own Sialkot workshop. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them. Supplied as a set — the contents can be adjusted to your list.

We work the instrument by hand at the finishing stage — box locks, hinges and tips are set individually, which is what separates a good instrument from a cheap one. Listed at $24.00, falling to $21.00 at 10 sets — about 12% off the single-unit price. Larger quantities are priced on request.

Samples go out on request so you can check the steel and the finish before you place a real order.

Bozeman Uterine Dressing Forceps 10 Inches (25.4cm) S-Shaped Double Curved Serrated Jaws Stainless Steel Obstetrics and Gynecology Surgical Instrument

Bozeman sponge & uterine dressing forceps is lightweight instrument with long jaws that are partially serrated. the Bozeman Uterine Forceps are a universal tool for various situations, such as holding gauze and sponges or clamping tissue within the uterus, manipulating tissue as well as doubling up as a longer hemostat. Due to the locking ratchet mechanism on the ring handles, these forceps can be locked in place to act as a clamp if desired. The shanks of this instrument are slightly curved and therefore provide greater visibility when used in the uterine cavity. The jaws are available either curved or straight.

BOZEMAN UTERINE FORCEPS FEATURES

BOZEMAN UTERINE DRESSING FORCEPS: Bozeman uterine forceps dimension is 10" (25.4cm) in length. Bozeman forceps have s- shaped double curved serrated jaws, long shank and ratchet locking mechanism system with finger ring handles, very functional during certain types of surgeries & gynecological procedures.
STAINLESS STEEL CONSTRUCTION: The stainless steel construction ensures maximum durability and dependability. You can reuse these forceps over time as they will not bend or tarnish.

ABOUT THIS INSTRUMENT

Curved Rochester Ochsner Steel Forceps Secure Tissue Holding is part of our surgical instruments range, produced start to finish at our Sialkot facility. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them. The name tells you what you are getting: a curved working end for reach around structures.

Forging, milling, heat treatment, hand finishing and passivation all happen under one roof, which is why we can change a dimension or a finish without a tooling charge. Listed at $8.00, falling to $5.00 at 25 pieces — about 38% off the single-unit price. Larger quantities are priced on request.

Samples go out on request so you can check the steel and the finish before you place a real order.

WI-46805810

Curved Surgical Forceps for General Surgery

$8.00 per piece

Trade price from **$6.00**
Minimum order 12 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

This is our pattern of Curved Surgical Forceps for General Surgery, made for general and specialty operating theatre use. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them. The name tells you what you are getting: a curved working end for reach around structures.

We work the instrument by hand at the finishing stage — box locks, hinges and tips are set individually, which is what separates a good instrument from a cheap one. Listed at $8.00, falling to $6.00 at 12 pieces — about 25% off the single-unit price. Larger quantities are priced on request.

Samples go out on request so you can check the steel and the finish before you place a real order.

Customizable Label Stainless Steel Tissue Forceps

$7.00 per piece

Trade price from **$4.00**
Minimum order 25 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

Customizable Label Stainless Steel Tissue Forceps is part of our surgical instruments range, produced start to finish at our Sialkot facility. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them.

Each unit is inspected by hand for alignment and action before packing, and we can photograph your actual pieces before they ship. Listed at $7.00, falling to $4.00 at 25 pieces — about 43% off the single-unit price.

Larger quantities are priced on request. Order it on its own or as part of a mixed shipment; we do not insist on a full container.

Debakey Bainbridge Vascular Forceps 8.5" Curved 2.5" Atraumatic Jaws

$22.99 per piece

Trade price from **$21.15**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Debakey Bainbridge Vascular Forceps Patent Ductus 8.5" (215.9mm) Curved 2.5" (63.5mm) Jaws Premium Quality Stainless Steel Ratcheted Handle Hemostatic Cardiovascular Surgical Instrument.

Debakey Bainbridge Artery Forceps with Straight and Curved Jaws are a ratcheted, finger ring instrument commonly used in cardiovascular procedures. Bainbridge Atrauma Multipurpose Vascular Clamp's ratcheted locking mechanism allows this instrument to be used as a hemostat to control blood flow. This forceps can be fashioned at the end of a bleeding artery in order to cease or control further leakage. The atraumatic teeth also allow it to be used for grasping fine or delicate tissue with little to no damage to the tissue itself. 1×2 rows of fine atraumatic teeth with longitudinally serrated tips and straight shanks which connect the boxlock to a ratchet mechanism has indentations for graduating the occlusion pressure.

Made with premium quality stainless steel and are available in 40 and 65mm working end sizes for treating small and larger arteries or veins. Fully autoclaved and can be reuse.

DEBAKEY BAINBRIDGE VASCULAR FORCEPS FEATURES:

- 8.5" (21.6cm) Overall Length.
- 2.5" (6.4cm) Long 1X2 Atraumatic Fine Teeth for Secure Grip.
- Curved Jaws.
- Straight Shanks for Deep Access.

DeBakey Micro Forceps Precision Surgical Tissue Handling Tool

$25.00 per piece

Trade price from **$15.00**
Minimum order 10 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

We manufacture DeBakey Micro Forceps Precision Surgical Tissue Handling Tool for general and specialty operating theatre use — made from bar stock to finished instrument in house. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them. The name tells you what you are getting: a micro-scale working end for fine and delicate work.

Each unit is inspected by hand for alignment and action before packing, and we can photograph your actual pieces before they ship. Listed at $25.00, falling to $15.00 at 10 pieces — about 40% off the single-unit price. Larger quantities are priced on request.

Order it on its own or as part of a mixed shipment; we do not insist on a full container.

DeBakey Micro Tissue Forceps Black Coated

$25.00 per piece

Trade price from **$15.00**
Minimum order 10 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

DeBakey Micro Tissue Forceps Black Coated is part of our surgical instruments range, produced start to finish at our Sialkot facility. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them. The name tells you what you are getting: a micro-scale working end for fine and delicate work.

We work the instrument by hand at the finishing stage — box locks, hinges and tips are set individually, which is what separates a good instrument from a cheap one. Listed at $25.00, falling to $15.00 at 10 pieces — about 40% off the single-unit price. Larger quantities are priced on request.

Samples go out on request so you can check the steel and the finish before you place a real order.

Heavy Duty Atraumatic Dental Extracting Forceps #F1 Upper Anterior Diamond Dusted Beveled Beak with Gold Hollow Python Grip Handle Premium Quality Stainless Steel Tooth Extraction Surgical Dental Instruments.

#F1 Extracting Forceps also known as “upper universal forceps” or “upper anterior forceps” are designed for upper anterior teeth extractions, providing a secure grip and precision. These are specialized atraumatic extraction forceps designed to minimize patient discomfort and tissue damage. The beveled beak design allows for engagement of both crown and root by sliding the beaks below the gum line.

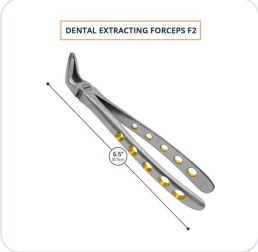

Diamond-dusted #F1 forceps are high-quality dental tools used for specific teeth and clinical situations during dental extractions. The gold hollow python grip handle enhances grip, reduces fatigue, and improves control, while stainless steel construction ensures durability and reliability, allowing for reuse over time.

UPPER ANTERIOR FORCEPS #F1 FEATURES

- Designed for Upper Anterior Teeth Extractions.
- Beveled Beak Design for Engagement of Crown and Root.
- Diamond-dusted Tips Provide Secure Grip and Precision Overtime.
- Idea for Atraumatic Extraction to Minimize Patient Discomfort and Tissue Damage.

Dental Orthodontic Buccal Tube De Bonding Tweezers 5.5"

$8.99 per piece

Trade price from **$8.27**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Dental Buccal Tube De Bonding Tweezers 5.5" (14cm) Bracket Placement Reverse Action Narrow End Forcep Pliers Premium Quality Stainless Steel Buccal Tube Placer Orthodontics Instruments.

Buccal Tube Tweezers used to hold, maneuver, and place brackets. Buccal Tube De Bonding Tweezers are designed with thin front tips with an angle to hold the buccal tube and to press the buccal tube when it is in its final position. These tweezers allow the orthodontist to effortlessly place and have a firm grip over buccal tubes during placement in molar areas. Dental buccal tube tweezers have a high degree of accuracy and flexibility, which can reduce errors in procedures.

Its thin and mini tip clearly shows the working area. The reverse spring action handle makes it easy for the operator to engage the buccal tube horizontally. Once the buccal tube is engaged, you can hold it gently to aim the target surface. The curved body of the buccal tube tweezers provides an unobstructed view for easier, more precise placement of buccal tubes. Premium quality stainless steel construction of these buccal tube bonder tweezers makes them sturdy and durable and can withstand daily use.

BUCCAL TUBE BONDER TWEEZERS FEATURES

- 5.5" (14cm) Overall Length.
- Slim Tip Design for Buccal Placement.

Desmarres Chalazion Forceps 3.5" (8.9cm) Large 17x28mm Oval Tips

$9.99 per piece

Trade price from **$9.19**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Desmarres Chalazion Forceps 3.5" (8.9cm) Large Size Oval Ring Inside Measures 17×28mm with Thumb Handle Premium Quality Stainless Steel Ophthalmic Surgical Instrument.

Desmarres Chalazion are ophthalmologic thumb forceps used to evert the eyelid and expose chalazion for drainage and removal. This forceps helps ophthalmology surgeons in immobilizing the eyelids during ophthalmic surgical procedures. Desmarres Chalazion Forceps also help surgeons reduce hemorrhaging during eye surgeries. Surgeons ideally use them to explore cysts of the lid or chalazion. Desmarres Chalazion forceps featuresa two sideways oval tips. One is solid and the other is fenestrated.

The chalazion on the eyelid is isolated between the two tips and the forceps are tightened by an attached screw, which pushes the chalazion upwards so a procedure can be completed. The size and consistency of the chalazion are primary factors when choosing which chalazion forceps to use. This product is straight with smooth tips and with a total length of 3 1/2" (9cm) and features multiple diameters to give surgeons more options. Made with premium grade stainless steel, ensuring a long-lasting experience of excellent performance.

DESMARRES CHALAZION FORCEPS FEATURES

- Overall Length is 3.5" (8.9cm).
- 17×28mm Inside Diameter of Upper Plate.

Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

We manufacture Ferguson Angiotribe Surgical Forceps Precision Vascular Instrument for general and specialty operating theatre use — made from bar stock to finished instrument in house. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them.

We work the instrument by hand at the finishing stage — box locks, hinges and tips are set individually, which is what separates a good instrument from a cheap one. Listed at $12.50, falling to $8.50 at 50 pieces — about 32% off the single-unit price.

Larger quantities are priced on request. Order it on its own or as part of a mixed shipment; we do not insist on a full container.

Ferris Smith Tissue Forceps 7" Serrated Platform 1×2 Teeth Tip

$20.99 per piece

Trade price from **$19.31**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Ferris Smith Tissue Forceps 7" (17.8cm) Serrated Platform Tips with 1×2 Teeth Premium Quality Stainless Steel Surgical Instruments

Ferris Smith Tissue Forceps are heavyweight forceps used with fibrous tissue, commonly in colorectal procedures. These thumb forceps feature 1×2 teeth at the tip with serrations along the jaw which help to improve grip on tissues. The narrow profile of the tip also increases precision of dissection. The operating forcep includes broad thumb grips which also have fine serrations. This works as an anti slip mechanism which give optimum control of instrument. These forceps are ideal for securely handling tissue. The ridged, wide grip assures comfort and control for the surgeon. This instrument can be sterilized and reused thanks to its highest quality surgical grade stainless steel.

FERRIS SMITH TISSUE FORCEPS FEATURES

- 7" (17.8cm) Overall Length.
- Straight 1×2 Teeth Tips.
- Have Dual Teeth and Serrations Tips For Secure Grip.
- Narrow Profile Jaws for Deep Access
- Broad Thumb Grips For Superior Control.
- Anti Slip Design For Comfortable Handling.
- Reusable.
- Made with Premium Quality Stainless Steel.

Rochester Pean Hemostat Forceps 7.25" (18.4cm) Curved Hemostatic Artery Clamp Pliers Multipurpose Locking Tweezer Clamps Serrated, Stainless Steel – Hemostats for Nurses, Fishing Forceps, Crafts and Hobby

FISHING HEMOSTAT FORCEPS FEATURES

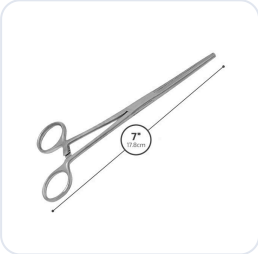

PEAN HEMOSTAT FORCEPS: The Waqar International's Hemostat Forceps Locking Clamps are an essential in the clinical, medical, lab or veterinary environment. They are made of Premium Quality materials with superior craftmanship. Ready to sterilize and use surgical-grade, stainless steel instrument that is used to clamp blood vessels or tag sutures. Typically used to compress blood vessels or other tubular structures to obstruct the flow of blood or fluids. The large finger loops, precision tips, and serrated self-locking jaws are ideal for grasping small objects securely.

HIGH-QUALITY STAINLESS STEEL CONSTRUCTION: Hot-drop forged from medical-grade stainless steel, these hemostats are autoclavable and won't rust, break, or even bend under pressure. Our production process passes the national and international quality and safety standards, these hemostat clamps are ideal for medical and veterinary settings as well as a key part of any fishing tackle kit.

THREE LOCKING POSITIONS: These hemostat clamps can be held in place by a locking forceps mechanism with three interlocking teeth that allow users to adjust the clamping force, once locked in place, even the smallest

Typically used to compress blood vessels or other tubular structures to obstruct the flow of blood or fluids. The large finger loops, precision tips, and serrated self-locking jaws are ideal for grasping small objects securely.

HIGH-QUALITY STAINLESS STEEL CONSTRUCTION: Hot-drop forged from medical-grade stainless steel, these hemostats are autoclavable and won't rust, break, or even bend under pressure. Our production process passes the national and international quality and safety standards, these hemostat clamps are ideal for medical and veterinary settings as well as a key part of any fishing tackle kit.

THREE LOCKING POSITIONS: These hemostat clamps can be held in place by a locking forceps mechanism with three interlocking teeth that allow users to adjust the clamping force, once locked in place, even the smallest

Flat Eyebrow Tweezers 4"

$9.99 per piece

Trade price from **$9.19**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Professional Eyebrow Tweezers 4" (10.2cm) Flat Tip Stainless Steel Beauty Tool Designed for Shaping and Grooming Eyebrows.

Straight eyebrow tweezers are effective tools for eyebrow shaping and hair removal, with a wide flat edge that allows for grabbing multiple or coarse hairs at once. While they may not be ideal for fine shaping, they excel in quick cleanup on larger areas like brows, upper lip, or chin. Additionally, they can be used for applying false eyelashes as the straight edge holds the lash band evenly, and occasionally for removal. Made of premium stainless steel, featuring sturdy, sharp, and durable tips that are easy to clean and reuse, ensuring lasting precision.

STRAIGHT EYEBROW TWEEZERS FEATURES

- Size: 4 Inches (10.2cm).
- Flat Tip for Quick Removal of Hair.
- Perfectly Aligned Tips to Close Evenly and Firmly to Grab Hair.
- Ergonomic Handle for Better Handling.
- Designed for Shaping and Grooming Eyebrows.
- Suitable for Both Thick and Fine, Stubborn, or Ingrown Hairs.
- Corrosion Resistance.
- Reusable.
- Made with High-quality Stainless Steel.

PACKAGE INCLUDE:

- 1 Pc Straight Eyebrow Tweezers 4" – Flat Tips

FOERSTER 25CM Stainless Steel Sponge Holding Forceps Medical

$3.50 per piece

Trade price from **$2.00**
Minimum order 10 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

FOERSTER 25CM Stainless Steel Sponge Holding Forceps Medical is part of our surgical instruments range, produced start to finish at our Sialkot facility. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them. The 25cm size shown is our standard; other sizes in the same pattern are made to order.

We work the instrument by hand at the finishing stage — box locks, hinges and tips are set individually, which is what separates a good instrument from a cheap one. Listed at $3.50, falling to $2.00 at 10 pieces — about 43% off the single-unit price. Larger quantities are priced on request.

Small trial orders are welcome — most buyers start with a sample or a single carton before committing.

Foerster Sponge Holding Forceps Curved 9.75″ (25cm) Serrated Jaws Medical Grade Stainless Steel Gynecological Surgical Veterinary Instruments

Sponge forceps or sponge holding forceps also known as Foerster-Ballenger Sponge Forceps used by doctors to pick up swabs, cotton or sponges during gynecology surgical procedures. The ratchet handle helps to hold the sponges firmly. These forceps are favorites by doctors because of their easy control. Foerster Dressing Forceps are essential in many different types of procedures. The ratchet mechanism towards the handles and have fenestrated looped jaws can have either smooth or serrated inner surfaces to prevent local damage. Also comes in straight and curved profiles according to the surgical approach.

SPONGE DRESSING & HOLDING FORCEPS FEATURES

SPONGE FORCEPS CURVED SERRATED 25CM: Oval tip scissor like shape curved serrated jaws, 3-step locking ratchet for better control with holding rounded rings. It helps to hold the forceps firmly and place it in the right position. They can be used to manipulate the tissue while the doctor performs the procedure.
STAINLESS STEEL CONSTRUCTION: The Stainless Steel construction ensures maximum durability and dependability. You can reuse these Hemostat Sponge Clamp Forceps over time as they will not bend or tarnish on

ABOUT THIS INSTRUMENT

Foerster Steel Sponge Forceps — one of 4,770 instruments we manufacture ourselves rather than buy in. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them. The steel is heat treated and passivated for corrosion resistance, then each instrument is checked by hand for jaw meet, smooth action and finish.

We state the grade we used on your quotation. Listed at $3.00, falling to $1.50 at 1 piece — about 50% off the single-unit price. Larger quantities are priced on request.

Order it on its own or as part of a mixed shipment; we do not insist on a full container.

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

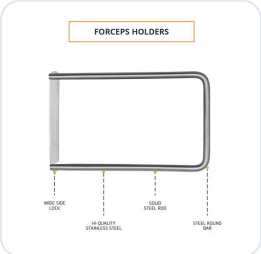

Forceps is part of our surgical instruments range, produced start to finish at our Sialkot facility. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them.

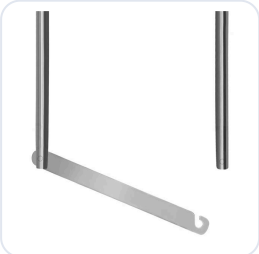

Every piece is hand-finished and inspected before it leaves the bench: joint action, tip alignment and surface finish are checked on each unit, not on a sample. Listed at $17.00, falling to $11.00 at 25 pieces — about 35% off the single-unit price.

Larger quantities are priced on request. Samples go out on request so you can check the steel and the finish before you place a real order.

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item

Forceps Holder 10" (25.4cm) with Hook Locking Premium Quality Stainless Steel Dental Surgical Instrument Stringer to Store, Organize, and Sterilize.

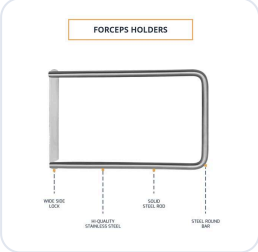

Sterilization forceps holders are stainless steel instruments used for storing, organizing, and sterilizing forceps. This instrument stringer used to maintain forceps in an upright position, ensuring accessibility and immersion in antiseptic solutions or readiness for autoclaving. This design helps maintain sterile conditions, prevents contamination, and protects the tips of forceps during transport. Constructed from high-quality German grade stainless steel, the Forceps Holder is designed for surgical and sterilization settings, ensuring stability and longevity for hanging forceps during use and autoclaving purpose.

STERILIZATION FORCEPS HOLDERS FEATURES

- Size 10 Inch (25.4cm) Long
- Hook Locking With Straight Stems Design.
- Used to Storage, Organize and Handle Forceps During Sterilization and Procedures.
- Various Sizes From 5.5" to 12" to Accommodate Different Clinical Needs.
- Designed for Promoting Safe and Contamination-free Handling.
- Highly Durable and Rustproof Quality.
- Reusable.

Forceps Holder 12" (30.5cm) with Hook Locking Premium Quality Stainless Steel Dental Surgical Instrument Stringer to Store, Organize, and Sterilize.

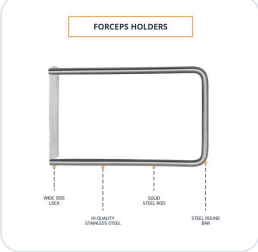

Sterilization forceps holders are stainless steel instruments used for storing, organizing, and sterilizing forceps. This instrument stringer used to maintain forceps in an upright position, ensuring accessibility and immersion in antiseptic solutions or readiness for autoclaving. This design helps maintain sterile conditions, prevents contamination, and protects the tips of forceps during transport. Constructed from high-quality German grade stainless steel, the Forceps Holder is designed for surgical and sterilization settings, ensuring stability and longevity for hanging forceps during use and autoclaving purpose.

STERILIZATION FORCEPS HOLDERS FEATURES

- Size 12 Inch (30.5cm) Long
- Hook Locking With Straight Stems Design.
- Used to Storage, Organize and Handle Forceps During Sterilization and Procedures.
- Various Sizes From 5.5" to 12" to Accommodate Different Clinical Needs.
- Designed for Promoting Safe and Contamination-free Handling.
- Highly Durable and Rustproof Quality.
- Reusable.

Forester 9.5" Surgical Instruments Stainless Steel Sponge Forceps

$3.00 per piece

Trade price from **$1.50**
Minimum order 1 piece

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

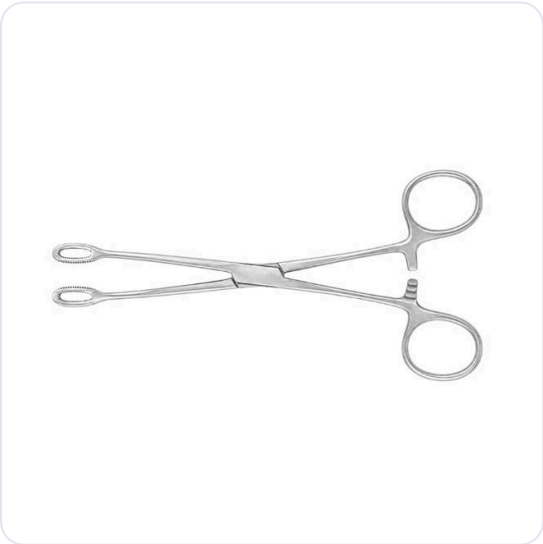

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

We manufacture Forester 9.5" Surgical Instruments Stainless Steel Sponge Forceps for general and specialty operating theatre use — made from bar stock to finished instrument in house. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them.

Every piece is hand-finished and inspected before it leaves the bench: joint action, tip alignment and surface finish are checked on each unit, not on a sample. Listed at $3.00, falling to $1.50 at 1 piece — about 50% off the single-unit price.

Larger quantities are priced on request. Small trial orders are welcome — most buyers start with a sample or a single carton before committing.

WI-36798500

Foster Sponge Holding Surgical Dressing Forceps

$6.20 per piece

Trade price from **$4.50**
Minimum order 25 pieces

Gruenwald Nasal Punch Thru-cut Foceps 4.5" (11.4cm) Shaft 45° Upward 2.5×12mm Oval Bite With Gold Plated Wide Ring Handle Premium Quality Stainless Steel ENT Surgical Instruments.

Gruenwald nasal forceps are specialized surgical instruments used in ENT procedures to cut and remove soft tissue, nasal polyps, cartilage, or bone fragments from the nasal cavity and sinuses. They are applied in Functional Endoscopic Sinus Surgery (FESS) for resecting diseased tissue, rhinoplasty and septoplasty for trimming obstructions, and turbinate reduction to improve airflow.

Gruenwald Nasal Punch feature 45-degree upward angle thru-cutting jaws enables surgeons to bypass obstructions and access superior target areas that is unreachable by straight forceps. Various bite sizes are available to accommodate specific anatomical requirements. Wide finger ring gold plated handles provide exceptional control and comfort, reducing hand fatigue during prolonged procedures. Made with premium-grade stainless steel, these forceps are sterilized and can be reused.

GRUENWALD NASAL PUNCH FEATURES

- 4.5" (11.4cm) Shaft.
- 45-Degree Upward Angle 2.5×12mm Oval Bite
- Through-cutting Jaws for Precise Excision of Nasal Cartilage, Soft Tissue, and Bony Fragments.

Halsted Mosquito Forcep Curved 5″ (12.7cm) Serrated Jaws Hemostat Clamps Locking Forceps High-Quality Stainless Steel Surgical Dental Instruments Tool

Halsted Mosquito Hemostatic Forceps are versatile, ratcheted, finger ring forceps used to clamp off smaller vessels that control the flow of blood and other clamping tasks in general surgical procedures. The ratcheted finger ring handle of Halstead Forceps provides a secure, locking grip to halt blood flow. A toothed variation is available for grasping delicate tissue in skin grafting, biopsies, or ophthalmologic procedures. They are not appropriate for use with large vessels or arteries.

Mosquito forceps are known for their fine tips, and short, fully serrated jaws. They are available curved or straight. The standard length for this instrument is 5 inches, although does offer some with a length of 5-1/2 inches. Halsted Mosquito Forceps are very similar to Hartmann Mosquito Forceps, however, the Hartmann style is finer and more delicate.

HALSTED-MOSQUITO FORCEPS FEATURES

HALSTED HEMOSTAT FORCEPS: 5″ Curved Halsted Mosquito are ideal for personal or professional use as fishing forceps or in electronic repair, crafting, medical, model building, or any operation that requires a delicate touch. The large finger loops, precision tips, and serrated self-locking jaws are ideal

✓ OEM / private-label marking

Halsted Mosquito Micro Forcep Straight 5″ (12.7cm) Serrated Jaws Hemostat Clamps Locking Forceps High-Quality Stainless Steel Surgical Dental Instruments Tool

Halsted Mosquito Hemostatic Forceps are versatile, ratcheted, finger ring forceps used to clamp off smaller vessels that control the flow of blood and other clamping tasks in general surgical procedures. The ratcheted finger ring handle of Halstead Forceps provides a secure, locking grip to halt blood flow. A toothed variation is available for grasping delicate tissue in skin grafting, biopsies, or ophthalmologic procedures. They are not appropriate for use with large vessels or arteries.

Mosquito forceps are known for their fine tips, and short, fully serrated jaws. They are available curved or straight. The standard length for this instrument is 5 inches, although does offer some with a length of 5-1/2 inches. Halsted Mosquito Forceps are very similar to Hartmann Mosquito Forceps, however, the Hartmann style is finer and more delicate.

HALSTED-MOSQUITO FORCEPS FEATURES

HALSTED HEMOSTAT FORCEPS: 5″ Straight Halsted Mosquito are ideal for personal or professional use as fishing forceps or in electronic repair, crafting, medical, model building, or any operation that requires a delicate touch. The large finger loops, precision tips, and serrated self-locking jaws are ideal

Harrison Bowl Steriliser Forceps Stainless Steel Surgical Instrument

$8.00 per piece

Trade price from **$5.00**
Minimum order 12 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

Harrison Bowl Steriliser Forceps Stainless Steel Surgical Instrument is part of our surgical instruments range, produced start to finish at our Sialkot facility. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them.

Every piece is hand-finished and inspected before it leaves the bench: joint action, tip alignment and surface finish are checked on each unit, not on a sample. Listed at $8.00, falling to $5.00 at 12 pieces — about 38% off the single-unit price.

Larger quantities are priced on request. Order it on its own or as part of a mixed shipment; we do not insist on a full container.

WI-46939543

Harrison Bowl Sterilizing Forceps-Manual Surgical Kit for Clinic

$7.30 per piece

ABOUT THIS INSTRUMENT

Harrison Bowl Sterilizing Forceps-Manual Surgical Kit for Clinic is part of our surgical instruments range, produced start to finish at our Sialkot facility. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them. Supplied as a set — the contents can be adjusted to your list.

Each unit is inspected by hand for alignment and action before packing, and we can photograph your actual pieces before they ship. Listed at $7.30, falling to $4.50 at 50 pieces — about 38% off the single-unit price. Larger quantities are priced on request.

Samples go out on request so you can check the steel and the finish before you place a real order.

ABOUT THIS INSTRUMENT

We manufacture Harrison Steriliser Forceps Surgical Stainless Steel Instrument for general and specialty operating theatre use — made from bar stock to finished instrument in house. Instruments of this type grasp, hold and transfer tissue, dressings or small components without crushing them.

Forging, milling, heat treatment, hand finishing and passivation all happen under one roof, which is why we can change a dimension or a finish without a tooling charge. Listed at $7.90, falling to $4.90 at 25 pieces — about 38% off the single-unit price.

Larger quantities are priced on request. Small trial orders are welcome — most buyers start with a sample or a single carton before committing.

Hartmann Crocodile Alligator Ear Forceps 10" Serrated Foreign Body Stainless Steel ENT Surgical Diagnostic Tool

Alligator Ear Forceps are a non-ratcheted, finger ring, ENT instrument commonly used for debridement and removing debris from the ear. These forceps are named after the German physician Arthur. These Ear Forceps used for removing foreign bodies. A common name also is "Crocodile forceps". Alligator forceps are surgical instruments that are great for grasping small objects or removing items from small cavities in the body.

The instrument has a long shaft that is set at a 45-degree angle to the grip, and a small set of serrated jaws at the tip. The jaws bear resemblance to the snout of an alligator, giving rise to the name of the tool. When not in use, the serrated jaws remain open and only close when the handles are squeezed. This function allows for the forceps to be inserted into a small cavity, partially open, and to then be closed on a lodged object, holding the object with a consistent application of pressure.

The ability to fine tune the amount of pressure applied, combined with the long reach of the tool, makes the forceps ideal for removing foreign bodies or for moving sterile dressings in a hard-to-reach area after surgical procedures. This instrument is made from Premium Stainless Steel that is tarnish free, corrosion resistant and

Hartmann Mosquito Forceps 3.5" (8.9cm) Curved Gold Plated

$8.99 per piece

Trade price from **$8.27**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Hemostat Mosquito Forceps 3.5" (8.9cm) Curved Serrated Jaws Full Gold Plated Finish Hemostat Locking Clamp Forceps High-Quality Stainless Steel Surgical Dental Instruments Tool.

Full gold hartmann mosquito forceps feature fine tips, short, and fully serrated jaws used as a clamping instrument to halt blood flow so that cauterization or ligation can be performed. "Hartmann" hemostat mosquito forceps are used as both a hemostat and for fine tissue dissection in shallow wounds and procedures. They are also used for holding small, fine sutures. Hartmann Mosquito Forceps are shorter and heavier than halsted mosquito forceps. Ratcheted handles can be locked in multiple positions in order to maintain variable levels of constant pressure. Forged from durable stainless steel and have large finger loops with serrated jaws that are ideal for grasping and holding small objects securely. Easy to clean and store in any tackle box, backpack, belt, pocket + other outdoor gear.

FULL GOLD HARTMANN MOSQUITO FORCEPS FEATURES

- 3.5" (8.9cm) Overall Length.
- Fully Gold Plated.
- Fine Serrated Jaws for Firm Grip and Minimal Tissue Trauma.
- Ratchet Lock Mechanism for Secure Locking.
- Finger Ring Handle for Comfortable, Secure Grip.
- Available in Straight and Curved Profiles
