10 Dental Mouth Mirrors with LED Light – Colored Handles

$159.99 per piece

Trade price from **$147.19**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

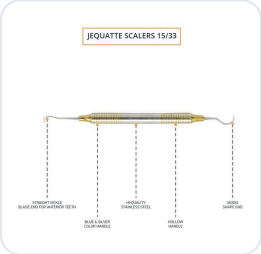

Pack of 10 Pieces Dental Mirror 6.5" (16.5cm) Colored Handles with Bright LED Light Removable Mirrors #4 & #5 Anti-Fog Teeth Mouth Inspection Mirror Oral Care Examination Instruments Tools for Dentist and Home Use.

Dental Mirror with LED Light makes you observe the teeth clearly. Illuminated Mouth Mirror is ideal for intraoral examination. LED Dental Mirror helps in improving your dental care and hygiene with a clear view of hard-to-reach places for improved brushing, flossing and overall mouth care. It combines a standard intraoral Anti-fog mirror with LED light uses AAA batteries (Not Included) with approximate length of 16.5cm.

DENTAL MIRROR WITH LED LIGHT FEATURES

POWDER COATING: It is lightweight with a shinning powder coating handle, has a great look and hand feel, convenient for dental use.
REMOVABLE HEAD: The head and the body of the mirror are connected by eccentric screw thread, which is firm and hard to break. Comes with detachable mirror head.
ANTIFOG MIRROR: The glass of the head is made of high transmittance material which is antifogging, heat-resistant and can be sterilized.
BRIGHT LED LIGHT: It also selects the high brightness LED as the special light source. The light is good and it can last many hours without any shadow and light blind angle, which makes the dental treatment more convenient and more accurate. Accept 2 sized AAA batteries (Not Included)

Pack of 10 Dental Sickle Scaler Anterior Towner Jacquette U15-33 Double Ended Gold & Silver Color With Hollow Handle Premium Quality Stainless Steel Plaque and Calculus Removal Dental Scaling Instruments

Jacquette Scalers 15/33 (U15 Towner & 33 Jacquette Scaler) Sturdy and sharp, our U15/33 sickle scaler provides the perfect shape and precision to effortlessly clean supragingival calculus on anterior surfaces. Towner-Jacquette U15/33 most commonly used in dental hygiene practice. Scalers are held in between the thumb, the index finger and the middle finger as a certain amount of pressure is required for a correct grasp. Our tools are individually hand-crafted for precise working and lasting durability.

DENTAL SICKLE SCALER FEATURES:

- Large sickle end and straight sickle blade end for anterior teeth
- Double-ended
- Tempered steel for enduring sharpness
- Available in hollow handle

PACKAGE INCLUDE:

- 10 Pcs Sickle Scaler Towner Jacquette U15/33 – Double Ended

TECHNICAL SPECIFICATIONS

MATERIAL: Stainless Steel
INSTRUMENT TYPE: Dental Scaler
APPLICATION: Dental Scaling, Root Planing, Plaque and Calculus Removal
COLOR COATING: Silver & Gold
TIP: Double Ended
FINISH: Polished

Pack of 10 Pcs Stainless Steel Dentulous Impression Trays XS, S, M, L & XL Perforated Upper & Lower Full Arch Denture Instruments

Dental impression trays are special devices that dentists use to place the impression material in to get an impression from the teeth and alveolar processus. These trays use to carry the material inside the mouth, plus control the whole impression process. These are an essential part of several procedures in dentistry i.e. for diagnostic reasons, impression for use in prosthetics for fixed or mobile restorations, impressions in oral surgery, impressions in orthodontics, implantology, maxillofacial surgery and many other dentistry disciplines. We have Perforated and Non-Perforated metal trays for the traditional dental putty to create a cast of the patient's mouth.

10 Wartenberg Neurological Pinwheel 7" Black Color Handle

$31.24 per piece

Trade price from **$28.74**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 10 Pieces Stainless Steel Wartenberg Pinwheel Diagnostic Neurological Sensory Pin Wheel 1 Head Chiropractic Surgical Instruments with Black Color Handle

A Wartenberg wheel also called a Wartenberg pinwheel or Wartenberg neurowheel, is a medical device for neurological use. The Wartenberg pinwheel is a precision machined stainless steel rotating spur (steel wheel option only) designed for neurological use. It was designed to test nerve reactions as it glides across the skin. Professional, Reusable neurological pinwheel. It was originally designed by Dr Robert Wartenberg to test nerve reactions (sensitivity) as it rolled systematically across the skin. A Wartenberg wheel is generally made of stainless steel with a handle of approximately seven inches in length.

WARTENBERG PINWHEEL FEATURES

TEST NERVE SENSITIVITY: Designed to test nerve reactivity, pain perception, and sensory response.
EXCELLENT CRAFTSMANSHIP: Evenly-spaced sharp pins provide a stimulating feeling when rolled across skin.
HIGH QUALITY MATERIALS: Constructed of medical-grade stainless steel. They are easy to clean for multiple uses on many patients. They are corrosion-resistant and built to last without bending, breaking or tarnishing. Latex free and comfortable for both the user and the patient.
COMFORTABLE GRIP: Stainless steel

$124.99 per piece

Trade price from **$114.99**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 100 Pcs Dental Mouth Mirror #5 with Handle 6.5" (16.5) Stainless Steel Dentist Tool for Teeth Cleaning Inspection ENT Surgical Dental Instruments.

A mouth mirror is a small, handheld dental instrument used by dentists and dental hygienists during dental examinations and procedures. It typically consists of a metal handle and a circular mirror attached at an angle. The mirror allows the dental professional to view the teeth, gums, and other oral structures from various angles and positions inside the mouth, helping them to identify problems such as cavities, tartar buildup, gum disease, and other issues. The mirror also aids in providing better visibility and access to areas that may be difficult to see directly. Additionally, it can be used to retract soft tissues and improve lighting within the oral cavity during procedures.

DENTAL MOUTH MIRROR FEATURES:

- Overall Length 6.5" (16.5cm).
- Plain Surface Mirror.
- Detachable Non-Slip Grip Handle.
- Perfect of Intraoral Examination, Diagnostic and Treatment Procedures.
- Can Be Sterilized and Reusable.
- Made With High Quality Stainless Steel.

PACKAGE INCLUDE:

- 100 Pcs Dental Mouth Mirrors #5 with Handle

Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

128Hz Stainless Steel Tuning Fork Reflex Hammer — one of 4,770 instruments we manufacture ourselves rather than buy in. Every piece is hand-finished and inspected before it leaves the bench: joint action, tip alignment and surface finish are checked on each unit, not on a sample.

Listed at $3.00, falling to $2.00 at 25 pieces — about 33% off the single-unit price. Larger quantities are priced on request.

Samples go out on request so you can check the steel and the finish before you place a real order.

Pack of 2 Dental Impression Trays Perforated Large Full-Arch Upper & Lower Stainless Steel Autoclavable Denture Instruments

Dental impression trays are special devices that dentists use to place the impression material in to get an impression from the teeth and alveolar processus. These trays use to carry the material inside the mouth plus control the whole impression process. We have Perforated and Non-Perforated metal trays for the traditional dental putty to create a cast of the patient's mouth.

PACK INCLUDES

- 1 Pc Impression Tray Perforated – Large – Upper
- 1 Pc Impression Tray Perforated – Large – Lower

IMPRESSION TRAYS FEATURES

- This is a 1 pair of perforated impression trays upper and lower large size for full-arch.
- Our trays have soft edges with an undercut made with a welded wire for the better retention of alginate.
- Trays are made up of high-quality stainless steel and feel a little heavy in weight as compared to the others in the market. Its heavy body offers strong resistance to distortion when taking out the cast from the tray.
- Its highly polished surface makes it easy to remove the dry impression material.
- It is normal to get foggy when put inside the mouth. Its fogginess does not affect its retention to hold the impression material because

25 Dental Mirrors #5 with Handle

$31.49 per piece

Trade price from **$28.97**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 25 Pcs Dental Mouth Mirror #5 with Handle 6.5" (16.5) Stainless Steel Dentist Tool for Teeth Cleaning Inspection ENT Surgical Dental Instruments.

A mouth mirror is a small, handheld dental instrument used by dentists and dental hygienists during dental examinations and procedures. It typically consists of a metal handle and a circular mirror attached at an angle. The mirror allows the dental professional to view the teeth, gums, and other oral structures from various angles and positions inside the mouth, helping them to identify problems such as cavities, tartar buildup, gum disease, and other issues. The mirror also aids in providing better visibility and access to areas that may be difficult to see directly. Additionally, it can be used to retract soft tissues and improve lighting within the oral cavity during procedures.

DENTAL MOUTH MIRROR FEATURES:

- Overall Length 6.5" (16.5cm).
- Plain Surface Mirror.
- Detachable Non-Slip Grip Handle.
- Perfect of Intraoral Examination, Diagnostic and Treatment Procedures.
- Can Be Sterilized and Reusable.
- Made With High Quality Stainless Steel.

PACKAGE INCLUDE:

- 25 Pcs Dental Mouth Mirrors #5 with Handle

$74.99 per piece

Trade price from **$68.99**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 25 Pieces Stainless Steel Wartenberg Pinwheel Diagnostic Neurological Sensory Pin Wheel 1 Head Chiropractic Surgical Instruments with Black Color Handle

A Wartenberg wheel also called a Wartenberg pinwheel or Wartenberg neurowheel, is a medical device for neurological use. The Wartenberg pinwheel is a precision machined stainless steel rotating spur (steel wheel option only) designed for neurological use. It was designed to test nerve reactions as it glides across the skin. Professional, Reusable neurological pinwheel. It was originally designed by Dr Robert Wartenberg to test nerve reactions (sensitivity) as it rolled systematically across the skin. A Wartenberg wheel is generally made of stainless steel with a handle of approximately seven inches in length.

WARTENBERG PINWHEEL FEATURES

TEST NERVE SENSITIVITY: Designed to test nerve reactivity, pain perception, and sensory response.
EXCELLENT CRAFTSMANSHIP: Evenly-spaced sharp pins provide a stimulating feeling when rolled across skin.
HIGH QUALITY MATERIALS: Constructed of medical-grade stainless steel. They are easy to clean for multiple uses on many patients. They are corrosion-resistant and built to last without bending, breaking or tarnishing. Latex free and comfortable for both the user and the patient.
COMFORTABLE GRIP: Stainless steel

3 Dental Articulator High Arch, Low Arch, & Crown & Bridge

$36.99 per piece

Trade price from **$34.03**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 3 Pcs Dental Lab Hinge Articulator Set – Premium Quality Restorative Dentistry High Arch, Low Arch and Crown & Bridge Chrome Plated Full Arch Denture Articulator for Mounting Mouth Models in a Dental Labs.

This 3 pcs dental articulator set includes High Arch, Low Arch, and Crown & Bridge types, making it ideal for diverse dental lab applications. Hinge articulators used to hold and position dental casts (models of a patient's teeth) in a fixed relationship, simulating jaw movements like opening and closing, aiding in diagnosis and treatment planning. Dental Hinge Articulators offer precise alignment for corrections of any occlusal (bite) discrepancies.

The High Arch model provides ample working space, while the Low Arch and Crown & Bridge options are suited for more compact or specialized cases. Their sturdy design ensures stability during model mounting and adjustment. Used widely in prosthodontics and restorative procedures, these tools improve accuracy in bite registration. The smooth chrome finish allows easy cleaning and sterilization. Suitable for professional dental technicians and labs, they meet German-grade quality standards.

HINGE DENTAL ARTICULATOR FEATURES

- Designed for Vertical Occlusion Relationship
- Helps Dentists Evaluate Occlusion and Plan Treatments.

3 Low Arch Dental Articulator Medium Chrome Plated

$35.99 per piece

Trade price from **$33.11**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 3 Dental Articulator Low Arch Medium Chrome Plated Adjustable Premium Quality Dental Lab Restorative Dentistry Full Arch Dental Tool Laboratory Supplies.

Hinge Dental Articulator is a device that uses a hinge mechanism to simulate the basic mandible motion, allowing for easy jaw opening and closing movements. Hinge articulators are basic dental tools used for diagnosing, treating, and fabricating dental restorations. The dental articulator uses a simple hinge mechanism, mimicking basic jaw motion but not lateral or forward jaw movements. A spring is installed in the center of the upper jaw, allowing displacement and returning to its original position. Low arch hinge articulators are typically constructed from die-cast, chrome-plated materials with stainless steel fittings for long-lasting durability. This device securely holds dental casts, maintaining vertical jaw relationships, especially during denture repairs or relining, and is ideal for simple cases requiring maximum tooth contact.

LOW ARCH DENTAL ARTICULATOR FEATURES

- Allows Hinge-like Opening and Closing of Dental Casts.
- Helps Dentists Evaluate Occlusion and Plan Treatments.
- Used in Fabricating Restorations Like Crowns, Bridges, and Dentures.
- Spring Installed in Upper Jaw Center for Displacement and Return to Original Position.

3 Sims Uterine Sound Curved 13" Graduated in CM, Malleable

$21.24 per piece

Trade price from **$19.54**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 3 Sims Uterine Sound 13" (33cm) Curved – Graduated in CM, Malleable Shaft, Silver Plated, Solid Flat Handle Single-Ended Medical Gynecology Surgical Instrument

Sims Uterine Sound Dilators is an ideal gynecological instrument predominantly used for dilating and probing the uterus and determining the depth and length of the cervical canal. The Sims Sound features a bulbous blunt tip to reduce the risk of perforation. The Sims Uterine Sound has a centimeter (cm) marked graduated malleable shaft and a copper silver plated finish, it is 330mm in length which makes it ideal for situations where a more malleable sound is useful.

SIMS UTERINE SOUND DILATORS FEATURES

- Blunt tips to prevent soft tissue damage.
- Lightweight to decrease user fatigue.
- Graduated for accurate assessment.
- Long malleable shaft.
- Non-Slip solid flat handle comfortable handling.
- Smooth edges minimize the risk of damage to surrounding tissue.
- Available in multiple anatomical variations.

5 Tongue Scraper 5" Oral Hygiene Care Stainless Steel Tongue Cleaner

$24.99 per piece

Trade price from **$22.99**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 5 Tongue Scraper 5" (12.7cm) for Adults – Smooth Round Edge U-shaped Stainless Steel Tongue Cleaner to Reduce Bad Breath Premium Quality Metal Tongue Scrubber for Oral Hygiene Dental Instrument.

Freshen your breath and improve oral hygiene with our premium quality metal tongue scraper. Our tongue cleaner for adults features two non-slip handles for a comfortable grip, and the U-shaped design targets precise areas to clean your tongue effectively. You can easily bend the U to make it smaller to suit the size of your mouth. It has two non-synthetic handles for good grip, ensuring convenient usage and effective cleaning. The wide head reduces vomiting or gag reflex, which makes it the best tongue scraper.

For best results, simply adding the tongue scraper at the end of your brushing routine twice a day keeps bacteria and build-up at bay. Smooth rounded edge of the scraper creates a pleasant scraping action easy on your tongue with dual carved handle which is easier to hold and operate. Made with High-quality stainless steel ensures that the tounge scraper cleaner will not rust and can be used overtime.

TOUNGE SCRAPER CLEANER FEATURES:

- 5" (12.7cm) Overall Length.
- U-Shaped Curved Scraping Width.
- Smooth Rounded Edge.
- Two Anti Slip Grip Handle.
- Anti-rust, Easy to Use & Clean.

Pack of 5 Pieces Stainless Steel Wartenberg Pinwheel Diagnostic Neurological Sensory Pin Wheel 1 Head Chiropractic Surgical Instruments with Black Color Handle

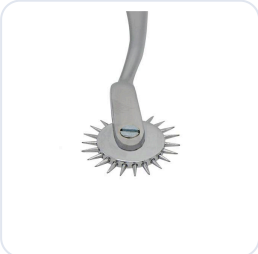

A Wartenberg wheel also called a Wartenberg pinwheel or Wartenberg neurowheel, is a medical device for neurological use. The Wartenberg pinwheel is a precision machined stainless steel rotating spur (steel wheel option only) designed for neurological use. It was designed to test nerve reactions as it glides across the skin. Professional, Reusable neurological pinwheel. It was originally designed by Dr Robert Wartenberg to test nerve reactions (sensitivity) as it rolled systematically across the skin. A Wartenberg wheel is generally made of stainless steel with a handle of approximately seven inches in length.

WARTENBERG PINWHEEL FEATURES

TEST NERVE SENSITIVITY: Designed to test nerve reactivity, pain perception, and sensory response.
EXCELLENT CRAFTSMANSHIP: Evenly-spaced sharp pins provide a stimulating feeling when rolled across skin.
HIGH QUALITY MATERIALS: Constructed of medical-grade stainless steel. They are easy to clean for multiple uses on many patients. They are corrosion-resistant and built to last without bending, breaking or tarnishing. Latex free and comfortable for both the user and the patient.
COMFORTABLE GRIP: Stainless steel

50 Dental Mirrors #5 Complete with Handle

$62.49 per piece

Trade price from **$57.49**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 50 Pcs Dental Mouth Mirror #5 with Handle 6.5" (16.5) Stainless Steel Dentist Tool for Teeth Cleaning Inspection ENT Surgical Dental Instruments.

A mouth mirror is a small, handheld dental instrument used by dentists and dental hygienists during dental examinations and procedures. It typically consists of a metal handle and a circular mirror attached at an angle. The mirror allows the dental professional to view the teeth, gums, and other oral structures from various angles and positions inside the mouth, helping them to identify problems such as cavities, tartar buildup, gum disease, and other issues. The mirror also aids in providing better visibility and access to areas that may be difficult to see directly. Additionally, it can be used to retract soft tissues and improve lighting within the oral cavity during procedures.

DENTAL MOUTH MIRROR FEATURES:

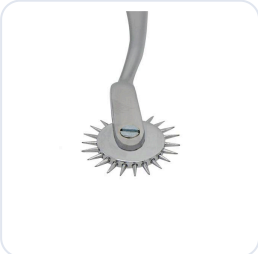

- Overall Length 6.5" (16.5cm).
- Plain Surface Mirror.
- Detachable Non-Slip Grip Handle.
- Perfect of Intraoral Examination, Diagnostic and Treatment Procedures.
- Can Be Sterilized and Reusable.
- Made With High Quality Stainless Steel.

PACKAGE INCLUDE:

- 50 Pcs Dental Mouth Mirrors #5 with Handle

Ainsworth Rubber Dam Punch 6.5" Dental Instruments

$10.99 per piece

Trade price from **$10.11**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Premium Quality Dental Rubber Dam Punch Ainsworth 6.5" (16.5cm) Surgical Dental Instruments – Multipurpose Punch Plier Also Useful to Pierce a Hole in Lightweight Leather and Fabric as Well.

Dental Rubber Dam Punch Ainsworth is an essential dental instrument for placing rubber dams during dental procedures. The circular, sharp blade of the Ainsworth punch creates precise holes in the rubber dam sheet, allowing it to be easily and securely attached to the teeth using dental clamps. With its ergonomic design, the Ainsworth punch provides a comfortable grip, making it simple to use during dental procedures. Made from high-quality stainless steel, the punch is both durable and corrosion-resistant, ensuring that it can be used repeatedly without compromising patient safety. Our punch is of high-quality not like other cheap alternatives

AINSWORTH PUNCH FEATURES

- 5 Different Hole Sizes in Easy-to-rotate Disc.
- Perfect for Making Holes in Rubber Dam for All Teeth
- 16.75cm (6.5in) Length
- The brand new high-quality product comes with a strong pouch.
- This rotary leather punch is designed to pierce a hole in lightweight leather and fabric.
- Simply rotate the die wheel to select the desired size.
- Creates 5 hole sizes: 0.8, 1, 1.2, 1.5 and 2 mm in diameter.

Babinski Reflex Hammer with Telescoping Metal Handle

$14.99 per piece

Trade price from **$13.79**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Babinski Reflex Hammer 6″ and Expended 15″ with Telescoping Metal Handle Diagnostic Reflex Percussion for Superficial Responses in Neurological Examinations

Babinski reflex hammer is designed for testing reflexes of the nervous system like a neurologist. The Babinski reflex hammer was created by Joseph Babinski and is similar to the Queen Square hammer, except that it has a metallic telescoping handle and PVC plastic bumper ring. Babinski telescopic neurological percussion hammer is 15″ open and 6″ closed handle allowing for compact storage. This hammer enables different percussion forces and the tapered handle base allows for plantar reflex testing. Babinski hammer is made of high-quality stainless steel to ensure durability and longevity.

BABINSKY PERCUSSION HAMMER FEATURES

- Stainless Steel Telescoping Handle.
- Overall Expandable 15″ Open and 6″ Closed.
- Rubber Head Can Be Used on Horizantal and Vertical Postions.
- Tempered Base Handle Allowing Planter Reflex Testing.
- Reusable.
- Convenient to Carry in Pocket

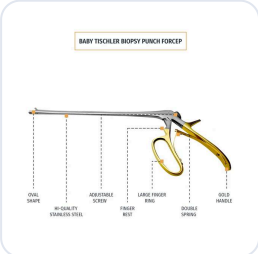

PACKAGE INCLUDE

- 1 Pc Babinski Telescoping Reflex Hammer 6″ and expended 15″

Baby Tischler Biopsy Punch 4.2mm x 2.3mm Bite with Gold Handle

$59.99 per piece

Trade price from **$55.19**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Micro Cut Oval Shape Baby Tischler Biopsy Punch Forceps 25cm Long Shaft 4.2mm x 2.3mm Bite Gold Series with Thumb Lock OB/GYN Medical Surgical Instrument

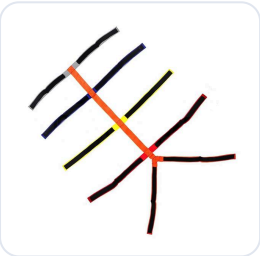

Baby Tischler or Townsend Mini or Mini Tischler Forceps are used to grasping and removing cervical tissue during a cervical biopsy. The Baby Tischler Biopsy Forceps is reusable, with a shaft length of 9.75″ (250mm) making the biopsies simplified and more accurate. The 4.2mm x 2.3mm small bite size incorporates a single lower tooth permitting sampling at the endocervical canal. Specially designed to be used to grasp difficult-to-reach tissue and a locking mechanism above the horn on the handle so the jaws can lock the tissue sample into place while the instrument is removed from the cervical canal. This reduces the risk of losing the tissue sample as the instrument is withdrawn.

Cervical biopsy is a surgical procedure in which a small amount of tissue is removed from the cervix. During the colposcopy, the clinician looks at the cervix and biopsies any areas that look abnormal. Tischler Biopsy Punch is an OB/GYN instrument used in colposcopy procedures to obtain cervical tissue samples for biopsy.

BABY TISCHLER BIOPSY PUNCH FEATURES

TISCHLER-BABY BIOPSY PUNCH: The Baby Biopsy Punch Forceps designed with a smaller bite size for less trauma. This is a Non-ratcheted, reusable

Backboard Spine Board Straps, Color Coded, Industrial Grade Medical Spider Straps for Stretcher, Immobilization, EMS First Responder Supplies

The Spider Strap strapping system is the perfect system for securing patients to the spine board, backboard or scoop stretcher. This strapping system works with just about every board, offering speed, efficient, sturdy and secure placement of the patient on the board.

SPINE BOARD STRAPS FEATURES INCLUDE:

10 POINT SPINE BOARD STRAP SYSTEM: The Color Coded Spine Board Strapping System is the ideal choice for EMS and First Responders looking for an affordable yet high quality strapping system to facilitate seamless patient transfers. It is easy to use, efficient and will rapidly become an essential piece of equipment for emergency medical professionals. 10 Color Coded straps come in bright shades for immediate identification and simple operation.

DURABLE NYLON STRAPS: The spineboard straps are made of a heavy nylon material making it superior to other straps on the market that easily wear. Strong velcro is stitched into each end for fast and precise use in any conditions, works faster than buckles which can take longer to apply, but gives the same support.

CONVENIENT AND SAFE DESIGN: The Spider Strap is quickly applied and holds the patient securely and comfortably to the backboard to allow

Burke Cervical Biopsy Punch Oval Shaped 3.25mm Wide x 5.5mm Long Bite 25cm (9.75") Long Straight Shaft with Gold Color Open Handle OB/GYN Medical Surgical Instrument

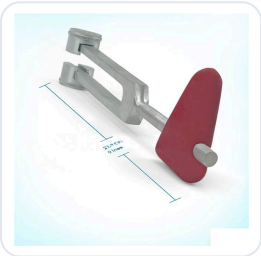

Cervical biopsy is a surgical procedure in which a small amount of tissue is removed from the cervix. During the colposcopy, the clinician looks at the cervix and biopsies any areas that look abnormal. Tischler Biopsy Punch is an OB/GYN instrument used in colposcopy procedures to obtain cervical tissue samples for biopsy.

The Burke Classic Biopsy Punch features an open handle for even the largest of hands and an oval-shaped bite for small samples. Sharp tooth design helps to anchor the tissue for sampling and retention without the risk of excessive penetration with accurate bite. Specially designed to be used to grasp difficult-to-reach tissue and a locking mechanism above the horn on the handle so the jaws can lock the tissue sample into place while the instrument is removed from the cervical canal. This reduces the risk of losing the tissue sample as the instrument is withdrawn.

BURKE BABY TISCHLER BIOPSY PUNCH FEATURES

BURKE BABY BIOPSY PUNCH: The Burke Baby Biopsy Punch Forceps designed with a smaller bite size for less trauma. This is a Non-ratcheted, reusable double spring OB/GYN instrument used in colposcopy

Unweighted C-512 Hz Tuning Fork 6.5″ (16.5cm) ENT Healing Therapy Surgical Medical Examination Diagnostic Tools Instrument

Tuning forks are used to assess hearing loss, vibration sense, bone fractures, and joint integrity. Tuning Fork C512 has u-shaped prongs is a powerful tool to have in sound therapy. The rounded handle is smooth for gripping. C-512 Hz Tuning Fork is ideal for healing, weber and Rinne hearing tests, bone conduction tests and more.

In the medical profession, tuning forks remain a preferred method of testing for certain types of hearing loss and also in orthopedic procedures. If x-rays are in short supply, doctors will use these tuning forks to identify whether a bone is fractured or not. For hearing loss testing, place a humming tuning fork near the patient's skull. We take pride in the quality of our products offering 100% guaranteed satisfaction.

Chakra Soul Purpose Cosmic Colored Weighted Healing Tuning

$2.00 per piece

Trade price from **$1.50**
Minimum order 1 piece

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

We manufacture Chakra Soul Purpose Cosmic Colored Weighted Healing Tuning for general and specialty operating theatre use — made from bar stock to finished instrument in house. We work the instrument by hand at the finishing stage — box locks, hinges and tips are set individually, which is what separates a good instrument from a cheap one.

Listed at $2.00, falling to $1.50 at 1 piece — about 25% off the single-unit price. Larger quantities are priced on request.

Tell us the quantity you actually need and we will price it, including quantities below the listed minimum.

Collyer Pelvimeter 12" with Scale Graduated in CM & Inches Surgical Pelvic Measuring Obstetrical & Gynecology Instruments

Collyer's pelvimeter is a caliper-shaped instrument with two stainless steel arms hinged at one end with a large thumbscrew, gauge at the hinge is graduated in both inches and centimetres are used to grasp the pelvis width. This obstetrical and gynecology instrument is predominantly used for measuring the pelvis and generally during pregnancy to monitor the progress of fetus growth to determine if natural vaginal delivery is possible or not.

The Collyer pelvimeter features two-bulb adjustable arm and a ruler used to grasp the pelvis width. Made from High-grade surgical stainless steel and can be reused after sterilization. This metal keeps it lightweight and rustproof.

COLLYER PELVIMETER FEATURES

- Caliper-shaped Instrument Graduated in CM & Inches.
- Two-bulb adjustable arm is used to grasp the pelvis width.
- Professional Grade Craftsmanship.
- Made with Stainless Steel
- East to Clean, Reusable

Dental Mirror Black Handle with Bright LED Light Removable Mirrors #4 & #5 Anti-Fog Teeth Mouth Inspection Mirror Oral Care Examination Instruments Tools for Dentist and Home Use

Dental Mirror with LED Light makes you observe the teeth clearly. Illuminated Mouth Mirror is ideal for intraoral examination. LED Dental Mirror helps in improving your dental care and hygiene with a clear view of hard-to-reach places for improved brushing, flossing and overall mouth care. It combines a standard intraoral Anti-fog mirror with LED light uses AAA batteries (Not Included) with approximate length of 16.5cm.

DENTAL MIRROR WITH LED LIGHT FEATURES

POWDER COATING: It is lightweight with a shinning powder coating handle, has a great look and hand feel, convenient for dental use.
REMOVABLE HEAD: The head and the body of the mirror are connected by eccentric screw thread, which is firm and hard to break. Comes with detachable mirror head.
ANTIFOG MIRROR: The glass of the head is made of high transmittance material which is antifogging, heat-resistant and can be sterilized.
BRIGHT LED LIGHT: It also selects the high brightness LED as the special light source. The light is good and it can last many hours without any shadow and light blind angle, which makes the dental treatment more convenient and more accurate. Accept 2 sized AAA batteries (Not Included)

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Dental Mouth Mirror #5 with Handle 6.5″(16.5cm) Premium Quality Stainless Steel Dentist Tool for Teeth Cleaning Inspection ENT Surgical Dental Instruments.

A mouth mirror is a small, handheld dental instrument used by dentists and dental hygienists during dental examinations and procedures. It typically consists of a metal handle and a circular mirror attached at an angle. The mirror allows the dental professional to view the teeth, gums, and other oral structures from various angles and positions inside the mouth, helping them to identify problems such as cavities, tartar buildup, gum disease, and other issues. The mirror also aids in providing better visibility and access to areas that may be difficult to see directly. Additionally, it can be used to retract soft tissues and improve lighting within the oral cavity during procedures.

DENTAL MOUTH MIRROR FEATURES:

- Overall Length 6.5″ (16.5cm).
- Plain Surface Mirror.
- Detachable Non-Slip Grip Handle.
- Perfect of Intraoral Examination, Diagnostic and Treatment Procedures.
- Can Be Sterilized and Reusable.
- Made With High Quality Stainless Steel.

PACKAGE INCLUDE:

- 1 Pc Dental Mouth Mirrors #5 with Handle

Front Surface Mouth Mirror #5 with Handle

$9.99 per piece

Trade price from **$9.19**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Front Surface Mouth Mirror #5 with Handle 6.5"(16.5cm) – Premium Quality Rhodium-Coated Front Surface Diagnostic Intraoral Dental Mirror for Inside Mouth/Teeth Cleaning Inspection with Cone Socket Stainless-Steel Oral Mirror ENT Surgical Dental Instruments.

Front surface dental mouth mirrors provide sharp and distortion free images with a smooth finish for patient comfort. A mouth mirror is a small, handheld dental instrument used by dentists and dental hygienists during dental examinations and procedures. It typically consists of a metal handle and a circular mirror attached at an angle. The mirror allows the dental professional to view the teeth, gums, and other oral structures from various angles and positions inside the mouth, helping them to identify problems such as cavities, tartar buildup, gum disease, and other issues.

The mirror also aids in providing better visibility and access to areas that may be difficult to see directly. Additionally, it can be used to retract soft tissues and improve lighting within the oral cavity during procedures.

FRONT SURFACE DENTAL MOUTH MIRROR FEATURES:

- Overall Length 6.5" (16.5cm).
- Front Surface Mirror for Sharp, Distortion Free Images
- Rhodium Coating to Resist Scratching
- Single-sided Cone Socket
- Detachable Non-Slip Grip Handle.

Hinge Dental Articulator Low Arch Medium Chrome Plated

$12.99 per piece

Trade price from **$11.95**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Low Arch Dental Articulator Medium Chrome Plated Adjustable Premium Quality Dental Lab Restorative Dentistry Full Arch Dental Tool Laboratory Supplies.

Hinge Dental Articulator is a device that uses a hinge mechanism to simulate the basic mandible motion, allowing for easy jaw opening and closing movements. Hinge articulators are basic dental tools used for diagnosing, treating, and fabricating dental restorations. The dental articulator uses a simple hinge mechanism, mimicking basic jaw motion but not lateral or forward jaw movements. A spring is installed in the center of the upper jaw, allowing displacement and returning to its original position. Low arch hinge articulators are typically constructed from die-cast, chrome-plated materials with stainless steel fittings for long-lasting durability. This device securely holds dental casts, maintaining vertical jaw relationships, especially during denture repairs or relining, and is ideal for simple cases requiring maximum tooth contact.

LOW ARCH DENTAL ARTICULATOR FEATURES

- Allows Hinge-like Opening and Closing of Dental Casts.
- Helps Dentists Evaluate Occlusion and Plan Treatments.
- Used in Fabricating Restorations Like Crowns, Bridges, and Dentures.
- Spring Installed in Upper Jaw Center for Displacement and Return to Original Position.

Hirschmann proctoscope is a hollow, tube-like speculum that is used for visual inspection of the rectum. The Hirschmann proctoscope is used in the diagnosis of hemorrhoids, carcinoma of anal canal or rectum and rectal polyp. It is used therapeutically for polypectomy and rectal biopsy. During proctoscopy, the proctoscope is lubricated and inserted into the rectum, and then the obturator is removed, allowing an unobstructed view of the interior of the rectal cavity.

HIRSCHMANN PROCTOSCOPE RECTAL SPECULUM FEATURES

HIRSCHMANN PROCTOSCOPE SPECULUM: Hirschmann Proctoscope Anal Rectal Speculum is designed to examine the anal canal for conditions such as hemorrhoids, anal fissures, etc. Ideal for hospitals and specialty clinics.
SAFE & SECURE: This Rectal Speculum offers an easy and non-slip grip with its perpendicular handle.
SLOTTED OBTURATOR: Hirschmann Proctoscope comes with Stainless Steel Slotted Obturator to help Anoscope procedure.
HIGH-QUALITY CONSTRUCTION: Premium grade precision crafted from quality stainless steel ensure a high instrument addition in your operating rooms. The instrument can be sterilized and reused.
GUARANTEED SATISFACTION: We offer a wide range of Gynecology Instruments with 100% customer satisfaction

Ivory Rubber Dam Punch (RDP) 6 3/4" Endodontic Instruments

$19.99 per piece

Trade price from **$18.39**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Rubber Dam Punch Ivory 17cm (6.75") Stainless Steel Restorative Endodontic Dental Tools

The Dental ivory rubber dam punch is used to place holes in rubber dam material to permit the passage of the dam over the crowns of the teeth. The handles are squeezed together and the plunger (punch) creates a hole in the rubber dam material. It is typically designed to create various hole sizes thanks to the cutting disc that rotates through a range of 6 hole sizes, providing the correct opening for the smallest anterior tooth to the largest molar. The disc is easy to rotate and allows you to punch six different clean hole sizes, from the smallest tooth to the largest molar.

The punch must always be centered in the cutting hole to achieve a clean cut. The rubber dam punch is fully autoclavable to help you maintain hygiene and compliance.

IVORY TYPE RUBBER DAM PUNCH FEATURES

- 6 Different Hole Sizes in Easy-to-rotate Disc.
- Perfect for Making Holes in Rubber Dam for All Teeth
- 17cm (6.75in) Length
- Autoclavable
- Made with High Quality Stainless Steel

PACKAGE INCLUDES

- 1 Pc Rubber Dam Punch Ivory 6.75" (17cm)

Kuglen Lens Manipulator Angled Round Eye Surgery Instrument

$15.00 per piece

Trade price from **$9.00**
Minimum order 10 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

ABOUT THIS INSTRUMENT

Kuglen Lens Manipulator Angled Round Eye Surgery Instrument — one of 4,770 instruments we manufacture ourselves rather than buy in. The name tells you what you are getting: an angled shank that keeps the hand clear of the sightline. The steel is heat treated and passivated for corrosion resistance, then each instrument is checked by hand for jaw meet, smooth action and finish.

We state the grade we used on your quotation. Listed at $15.00, falling to $9.00 at 10 pieces — about 40% off the single-unit price. Larger quantities are priced on request.

We ship door to door worldwide, and can quote DDP if you would rather not handle the import yourself.

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item

Large Hinge Dental Articulator High Arch Chrome Plated

$14.99 per piece

Trade price from **$13.79**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

High Arch Dental Articulator Large Chrome Plated Adjustable Premium Quality Dental Lab Restorative Dentistry Full Arch Dental Tool Laboratory Supplies.

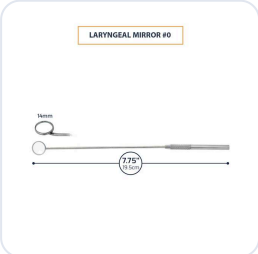

A high arch hinge articulator is a dental tool used to mount plaster casts of a patient's upper and lower jaws, mimicking jaw movements. The device functions as a mechanical hinge, mimicking jaw movements, and serves as a platform for mounting and holding dental casts for analysis and treatment planning. These dental articulators are ideal for simple restorative procedures and occlusal assessments, allowing technicians to work with models to create natural-fitting restorations. The high arch design of the hinge articulators allows for basic opening and closing movements, while also providing ample space for full-arch cases and complex restorations. These dental articulators made from chrome-plated material, offer durability and stability for plaster restoration models featuring stainless steel fittings for added strength and corrosion resistance.

HIGH ARCH DENTAL ARTICULATOR FEATURES

- Designed for Vertical Occlusion Relationship
- Helps Dentists Evaluate Occlusion and Plan Treatments.
- Used in Fabricating Restorations Like Crowns, Bridges, and Dentures.
- Upper and Lower Parts Easily Separate.

Lieberman Large Solid

$13.00 per piece

Trade price from **$4.00**
Minimum order 10 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

ABOUT THIS INSTRUMENT

This is our pattern of Lieberman Large Solid, made for general and specialty operating theatre use. Forging, milling, heat treatment, hand finishing and passivation all happen under one roof, which is why we can change a dimension or a finish without a tooling charge.

Listed at $13.00, falling to $4.00 at 10 pieces — about 69% off the single-unit price. Larger quantities are priced on request.

Tell us the quantity you actually need and we will price it, including quantities below the listed minimum.

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

Metal Impression Trays Solid Large Upper & Lower

$8.99 per piece

Trade price from **$8.27**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Pack of 2 Dental Metal Impression Trays Solid Large Full Arch Upper & Lower Premium Quality Stainless Steel Autoclavable Denture Instruments.

Dental impression trays are special devices that dentists use to place the impression material in to get an impression from the teeth and alveolar processus. These trays use to carry the material inside the mouth plus control the whole impression process. We have Perforated and Non-Perforated metal trays for the traditional dental putty to create a cast of the patient's mouth.

PACK INCLUDES

- 1 Pc Impression Tray Solid – Large – Upper
- 1 Pc Impression Tray Solid – Large – Lower

IMPRESSION TRAYS FEATURES

- This is a 1 pair of solid impression trays upper and lower large size for full-arch.
- Our trays have soft edges with an undercut made with a welded wire for the better retention of alginate.
- Trays are made up of high-quality stainless steel and feel a little heavy in weight as compared to the others in the market. Its heavy body offers strong resistance to distortion when taking out the cast from the tray.
- Its highly polished surface makes it easy to remove the dry impression material.
- It is normal to get foggy when put inside the mouth. Its fogginess does not affect its retention to hold the impression material because

Molar Band Seater Bite Sticks Blue with Serrated Tip

$8.99 per piece

Trade price from **$8.27**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Molar Band Seater Bite Sticks 5" (12.7cm) Blue with Stainless Steel Triangular Serrated Tip High Heat Autoclavable Dental Orthodontic Instrument.

Band seater pusher bite sticks are orthodontic instruments used for seating bands (metal rings) during orthodontic procedures. Band seater bite sticks typically feature a flat, spatula-like end with triangular serrated tip that allows the orthodontist to gently press and position the dental band around the tooth. By biting down on the stick, the patient helps apply controlled pressure, allowing the band to settle properly without causing damage. Bite Sticks are essential in orthodontic treatments for ensuring proper alignment and positioning of dental bands, which are crucial components in braces and other orthodontic appliances. Molar band seater pusher bite sticks manufactured using a high temperature plastic that will withstand hihg heat temperatures ensures optimal results and precision.

BAND SEATER BITE STICKS FEATURES

- 5" (12.7cm) Overall Length.
- Single Ended.
- Stainless Steel Triangular Serrated Tip..
- Lightweight, Comfortable Non Slip Plastic Handle.
- Can Withstand High Temperatures.
- Can be Cold Sterilized.
- Will not Discolor.
- Easy to Clean and Reusable.

Molar Band Seater Bite Sticks 5" (12.7cm) Red with Stainless Steel Triangular Serrated Tip High Heat Autoclavable Dental Orthodontic Instrument.

Band seater pusher bite sticks are orthodontic instruments used for seating bands (metal rings) during orthodontic procedures. Dental band pusher bite stick typically feature a flat, spatula-like end with triangular serrated tip that allows the orthodontist to gently press and position the dental band around the tooth. By biting down on the stick, the patient helps apply controlled pressure, allowing the band to settle properly without causing damage. Bite Sticks are essential in orthodontic treatments for ensuring proper alignment and positioning of dental bands, which are crucial components in braces and other orthodontic appliances. Molar band seater pusher bite sticks manufactured using a high temperature plastic that will withstand hihg heat temperatures ensures optimal results and precision.

BAND SEATER BITE STICKS FEATURES

- 5" (12.7cm) Overall Length.
- Single Ended.
- Stainless Steel Triangular Serrated Tip..
- Lightweight, Comfortable Non Slip Plastic Handle.
- Can Withstand High Temperatures.
- Can be Cold Sterilized.
- Will not Discolor.
- Easy to Clean and Reusable.

Multi Colored Industrial Security Construction

$8.50 per piece

Trade price from **$7.00**
Minimum order 10 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

ABOUT THIS INSTRUMENT

Multi Colored Industrial Security Construction is part of our surgical instruments range, produced start to finish at our Sialkot facility. Forging, milling, heat treatment, hand finishing and passivation all happen under one roof, which is why we can change a dimension or a finish without a tooling charge.

Listed at $8.50, falling to $7.00 at 10 pieces — about 18% off the single-unit price. Larger quantities are priced on request.

We ship door to door worldwide, and can quote DDP if you would rather not handle the import yourself.

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

$10.99 per piece

Trade price from **$10.11**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Premium Quality Pinard Horn Fetal Heartbeat Stethoscope 5.3″ (13.5cm) Lightweight Aluminium Metal Medical Obstetrics and Gynecology Surgical Instrument

Pinard Fetoscope also known as the “Pinard Horn”is a type of stethoscope used for listening to the heartbeat of a fetus. Pinard horn is a hollow horn-shaped stethoscope approximately 5.3 inches in length, that is pressed against the patients stomach. The horn must be at a precise location close to the heart in order to hear the fetal heartbeat. Pinard fetal stethoscope is considered to be a more practical, less expensive and safer alternative to the doppler device. This traditional method of listening to a baby’s heart whilst in the womb has been popular with midwives, doctors, nurses and expectant parents since its invention in the 19th Century by Dr Adolphine Pinard. Made with high quality Aluminium material and can be used after sterilization.

PINARD FETAL STETHOSCOPE FEATURES

- Crafted with 13.5cm (5.3″) Overall Length.
- Double Ended Hollow Horn-shaped Stethoscope.
- Aluminium Lightweight Construction.
- Traditional but More Practical & Less Expensive.
- Function as a Ear Trumpet Amplifying the Heart Sounds of the Embryo in the Womb.
- Can be Reused after Sterilization.

Post Mortem Headrest Reusable Stainless Steel Anatomy Laboratory

$45.00 per piece

Trade price from **$32.00**
Minimum order 5 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

ABOUT THIS INSTRUMENT

Post Mortem Headrest Reusable Stainless Steel Anatomy Laboratory — one of 4,770 instruments we manufacture ourselves rather than buy in. The name tells you what you are getting: full reusability — clean, autoclave and use again. The steel is heat treated and passivated for corrosion resistance, then each instrument is checked by hand for jaw meet, smooth action and finish.

We state the grade we used on your quotation. Listed at $45.00, falling to $32.00 at 5 pieces — about 29% off the single-unit price. Larger quantities are priced on request.

Samples go out on request so you can check the steel and the finish before you place a real order.

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

Sims Uterine Sound 13" (33cm) Curved Graduated in CM, Malleable Shaft, Silver Plated, Solid Flat Handle Single-Ended Medical Gynecology Surgical Instrument

Sims Uterine Sound Dilators is an ideal gynecological instrument predominantly used for dilating and probing the uterus and determining the depth and length of the cervical canal. The Sims Sound features a bulbous blunt tip to reduce the risk of perforation. The Sims Uterine Sound has a centimeter (cm) marked graduated malleable shaft and a copper silver plated finish, it is 330mm in length which makes it ideal for situations where a more malleable sound is useful.

SIMS UTERINE SOUND FEATURES

- Blunt tips to prevent soft tissue damage.
- Lightweight to decrease user fatigue.
- Graduated for accurate assessment.
- Long malleable shaft.
- Non-Slip solid flat handle comfortable handling.
- Smooth edges minimize the risk of damage to surrounding tissue.
- Available in multiple anatomical variations.

PACKAGE INCLUDE:

- 1 Pc Sims Uterine Sound 13" (33cm), Graduated in CM, Malleable, Silver Plated – Curved

Sinus Window Bone Tamper 4mm Serrated Tip

$9.99 per piece

Trade price from **$9.19**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Sinus Window Bone Tamper 4mm Serrated Tip 6.5" (16.5cm) Long Premium Quality Stainless Steel Maxillary Sinus Augmentation Dental Implant Instrument.

The sinus window bone tampers are dental tools used in sinus lift procedures to create a window into the maxillary sinus, enabling bone graft and implant placement. They separate the sinus membrane (Schneiderian Membrane) from surrounding bone, allowing for optimal sinus lift. Maxillary sinus augmentation is a surgical procedure that elevates the sinus floor in the upper jaw for bone grafting when there's insufficient bone for dental implants.

Sinus lift bone tamper is a versatile tool with a round tip, knurled handle, and multiple sizes, allowing surgeons to compact and tamp small and large graftings. These sinus bone tampers are made of premium grade stainless steel, ensuring high quality and performance standards for your operating rooms.

SINUS WINDOW BONE TAMPER FEATURES

- 6.5" (16.5cm) Overall Length.
- 4mm Diametter Round Serrated Tips
- Solid Straight Design for Deep Access.
- Knurled Grip Non-Slip Handle.
- Reusable.
- Made with Premium Grade Stainless Steel.

PACKAGE INCLUDE

Small IMS Box 1.56″ x 1.25″ x 1″ for Instrument Sterilization

$12.99 per piece

Trade price from **$11.95**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

IMS Parts Box Small 1.56″ x 1.25″ x 1″ – Stainless Steel Small Dental Instruments and Materials Holder and Oragnizer During Sterilization Process.

IMS (Integrated Management System) Box is utilized to organize small items like rubber dam clamps and matrix band retainers during the sterilization process. This box is ideal for holding small items in cassettes, ultrasonic cleaners, and automated washers, and can be placed directly into their respective baskets. IMS accessory box is a crucial tool for organizing dental tools, ensuring their security during autoclaving, minimizing direct handling, and enhancing clinic efficiency by reducing contamination risk. The stainless-steel construction of this IMXaccessory box enhances its durability, rust resistance, and sterilization efficiency, making it a crucial tool for infection control and dental workflow.

IMS PARTS BOXE FEATURES

- IMS Box Stainless Steel Small 1.56″ x 1.25″ x 1″.
- Organize Small Items Like Rubber Dam Clamps and Matrix Band Retainers.
- Box with Lid to Securely Hold Small Items.
- Easly Fit Cassette Accessory Areas.
- Can Directly Placed Into Ultrasonic Cleaners and Automated Washers.
- Designed for Autoclave Sterilization for Easy Maintenance and Safety.
- Can Withstand the Rigors of Repeated Use.

Spine Board Stretcher Backboard for Patient – EMT Backboard Immobilization Portable Patient Transport Rescue Lightweight PE Plastics Ambulance Stretcher Gurney – Black

Spine Board is an economical yet extremely strong board commonly used for safely transporting seriously injured and immobile patients. It is a must have in first-aid equipment for medical centers. Made of high strength engineering plastic, this spine board is enduring, anti-aging, weight loading and easy for storage.

SPINE BOARD STRETCHER FEATURES

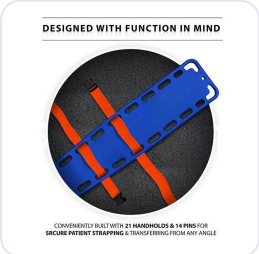

HEAVY DUTY SPINE BOARD: The spine board is a device for recovery, immobilization, and transfer of a patient to a stretcher with suspected spinal injuries. The durable yet lightweight but sturdy material allows smooth patient transfer with minimal effort. Safely lifts up to 700 lbs with a heavy-duty shell that can withstand many elements and years of use. Dimensions: 72.75″ x 17.75″ x 2.5″ – Weight: 16.1 lbs

PROTECTS PATIENTS + EMS WORKERS: Prevents stress on the lower back of personnel when shifting patients without putting stress on the patient's injuries. Ultra Smooth surface with no sharp edges to keep skin safe. The flat board is 100% x-ray translucent and will prevent aggravation of possible spinal injuries while transferring and medical imaging is performed.

Stainless Steel 565265120mm Autoclavable Sterilization Container Surgical Instrument

$250.00 per piece

Trade price from **$180.00**
Minimum order 1 piece

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

ABOUT THIS INSTRUMENT

Stainless Steel 565265120mm Autoclavable Sterilization Container Surgical Instrument — one of 4,770 instruments we manufacture ourselves rather than buy in. The 565265120mm size shown is our standard; other sizes in the same pattern are made to order.

Every piece is hand-finished and inspected before it leaves the bench: joint action, tip alignment and surface finish are checked on each unit, not on a sample. Listed at $250.00, falling to $180.00 at 1 piece — about 28% off the single-unit price.

Larger quantities are priced on request. We ship door to door worldwide, and can quote DDP if you would rather not handle the import yourself.

Urinals Bedpans for Elderly Men & Women, Heavy Duty Autoclavable Stainless Steel Hospital Urinals Bed pan for Medical Centers and Home Use, Size; 14" x 11 3/8"

A bed pan or bedpan is a receptacle used for the toileting of a bedridden patient in a health care facility. A bedpan can be used for both urinary and fecal discharge. Many diseases can confine a patient to bed, necessitating the use of bedpans, including Alzheimer's disease, Parkinson's disease, stroke, and dementia. Additionally, many patients may be confined to a bed temporarily as a result of a temporary illness, injury, or surgery.

Bedpans are usually constructed of stainless steel, which is easy to clean and durable but may be cold, hard, and uncomfortable to use. Also, the supporting area of some products is very small, and prolonged use can cause pressure ulcers. To solve these problems, ergonomic bedpans have been developed, which support the patient with a larger area of less-conductive plastic. Some designs completely cover the genitalia during use, offering protection and an extra measure of privacy. On the other hand, the material is more difficult to sterilize and may become a reservoir for microorganisms.

STAINLESS STEEL BED PAN FEATURES

AUTOCLAVABLE HIGH QUALITY: Made of high-quality durable stainless steel. The Bedpan is convenient, durable,

Stainless Steel Kidney Tray Medical Dish Bowl

$2.50 per piece

Trade price from **$1.80**
Minimum order 10 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

ABOUT THIS INSTRUMENT

Stainless Steel Kidney Tray Medical Dish Bowl is a surgical instrument we forge, grind and finish in our own Sialkot workshop. Forging, milling, heat treatment, hand finishing and passivation all happen under one roof, which is why we can change a dimension or a finish without a tooling charge.

Listed at $2.50, falling to $1.80 at 10 pieces — about 28% off the single-unit price. Larger quantities are priced on request.

We ship door to door worldwide, and can quote DDP if you would rather not handle the import yourself.

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

Thomas-Gaylor Uterine Biopsy Punch Forceps 9.5" (24.1cm) Angled Shank Triangular Bite Bar Interfitted Tips with Ratchet Lock Figer Ring Handle Premium Quality Stainless Steel Obstetrics & Gynecology Surgical Instruments.

Triangular Bite Thomas Gaylor Biopsy Punch Forceps are specialized surgical instruments used in gynecological procedures, specifically designed for cervical and uterine biopsies. They offer precise tissue sampling, improved visibility, and efficient tissue excision. Made from durable German-grade stainless steel, they minimize trauma to surrounding tissues and are essential in OB/GYN procedures. This biopsy forceps features a triangular punch tip with single bar that is ideal to excise the tissue sample with precision. The upper jaw has a pin that efficiently holds the specimen in place during removal. The long-reaching angled shafts designed for easy accessing the cervix that connect with boxlock to the finger rings for a stable grip. The boxlock permits to close the interfitted cup tips against each other with a smooth movement. Made with German Grade Stainless Steel and can be sterilized for repeat use.

THOMAS GAYLOR BIOPSY PUNCH FORCEPS FEATURES

- Crafted With 9.5" (24.1cm) Overall Length.
- Interfitted Triangular Bite Tips.
- Long-reaching Angled Shafts for Accessing the Cervix.

Tischler Standard Straight Biopsy Punch 7x3mm Bite

$59.99 per piece

Trade price from **$55.19**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

Biopsy Punch Tischler Standard – Straight – Bite Size: 7mm x 3mm Gold Handle 25cm Oval Shape (Single Wire) OB/GYN Medical Surgical Instrument.

This Biopsy Punch Forceps have a straight shank and an oval tip with single wire. It features a single, lower tooth used to grasp difficult to reach tissue and a locking mechanism above the horn on the handle so the jaws can lock the tissue sample into place while the instrument is removed from the cervical canal. Forceps have double leaf spring for easy working. The forceps cups can fit into each other, it reduces the risk of losing the tissue sample as the instrument is withdrawn.

Cervical biopsy is a surgical procedure in which a small amount of tissue is removed from the cervix. During the colposcopy, the clinician looks at the cervix and biopsies any areas that look abnormal. Tischler Biopsy Punch is an OB/GYN instrument used in colposcopy procedures to obtain cervical tissue samples for biopsy.

TISCHLER BIOPSY FORCEPS FEATURES

TISCHLER STANDARD BIOPSY PUNCH: Tischler Cervical Punch Biopsy Forceps is a Non-ratcheted, Reusable double spring OB/GYN instrument used in colposcopy procedures to obtain cervical tissue samples for biopsy. With a built-in thumb lock mechanism that secures and protects the cutting tip, our Tischler Biopsies meet and exceed

V Type Uterine Manipulator 37cm

$39.70 per piece

Trade price from **$39.50**
Minimum order 1 piece

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

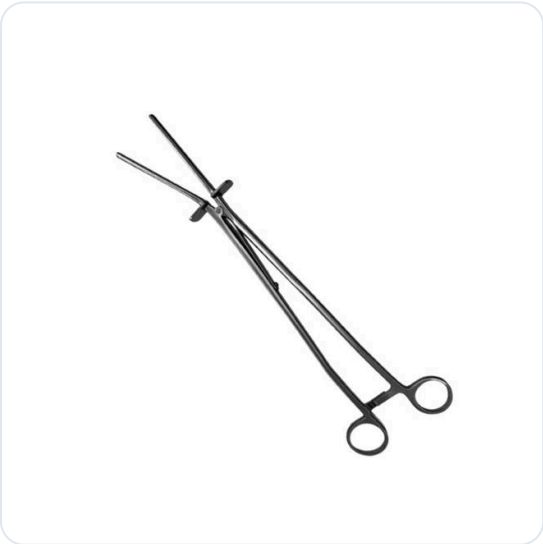

ABOUT THIS INSTRUMENT

V Type Uterine Manipulator 37cm is part of our surgical instruments range, produced start to finish at our Sialkot facility. The 37cm size shown is our standard; other sizes in the same pattern are made to order.

Forging, milling, heat treatment, hand finishing and passivation all happen under one roof, which is why we can change a dimension or a finish without a tooling charge. Listed at $39.70, falling to $39.50 at 1 piece — about 1% off the single-unit price.

Larger quantities are priced on request. Samples go out on request so you can check the steel and the finish before you place a real order.

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

ABOUT THIS INSTRUMENT

We manufacture V Type Uterine Manipulator 37cm Stainless Steel Gynecology Surgical for general and specialty operating theatre use — made from bar stock to finished instrument in house. The 37cm size shown is our standard; other sizes in the same pattern are made to order.

Each unit is inspected by hand for alignment and action before packing, and we can photograph your actual pieces before they ship. Listed at $39.70, falling to $39.50 at 1 piece — about 1% off the single-unit price.

Larger quantities are priced on request. Order it on its own or as part of a mixed shipment; we do not insist on a full container.

Wartenberg Neurological 3 Head Pin Wheel – Strong Sensation Stainless Steel Neurological Diagnostic Pinwheel Chiropractic Surgical Instruments with Smooth Handle. Silver

Wartenberg wheel also called a Wartenberg pinwheel or Wartenberg neurowheel, is a medical device for neurological use. The Wartenberg pin wheel is a precision machined stainless steel rotating spur (steel wheel option only) designed for neurological diagnostic purposes. It is designed to test nerve reactions as it glides across the skin. It was originally designed by Dr Robert Wartenberg to test nerve reactions (sensitivity) as it rolled systematically across the skin. Made with high quality stainless steel and a non-slip handle of approximately 6.5" in length. Fully Autoclavable.

3 HEAD WARTENBERG NEURO PINWHEEL FEATURES

STRONG NERVE SENSITIVITY TEST : Designed to test nerve reactivity, pain perception, and sensory response. It has 3 head and create strong sensation, and rolling fan design, adaptable for testing nerve sensitivity by rolling the pointed tip back and forth on the skin.

EXCELLENT CRAFTSMANSHIP: Evenly-spaced sharp pins provide a stimulating feeling when rolled across skin.

HIGH QUALITY MATERIALS: Constructed of medical-grade stainless steel. They are easy to clean for multiple uses on many patients. They

XL Stainless Steel Mesh Tray for Surgical

$85.00 per piece

Trade price from **$75.20**
Minimum order 10 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

ABOUT THIS INSTRUMENT

We manufacture XL Stainless Steel Mesh Tray for Surgical for general and specialty operating theatre use — made from bar stock to finished instrument in house. We work the instrument by hand at the finishing stage — box locks, hinges and tips are set individually, which is what separates a good instrument from a cheap one.

Listed at $85.00, falling to $75.20 at 10 pieces — about 12% off the single-unit price. Larger quantities are priced on request.

Order it on its own or as part of a mixed shipment; we do not insist on a full container.

Material	Stainless steel — we state the grade on your quotation
Reusable	Yes, autoclavable
Finish	Satin, mirror or black — your choice at order
Marking	Your logo or part number can be applied — ask us what is possible for this item
Lead time	Typically 15–30 days depending on quantity and marking

Zahle Wax Carver No. 10

$7.99 per piece

Trade price from **$7.35**
Minimum order 21 pieces

✓ Surgical-grade stainless steel ✓ Reusable, autoclavable
✓ OEM / private-label marking

ABOUT THIS INSTRUMENT

Zahle Wax Carver No. 10 is an instrument we forge, grind and finish in our own Sialkot workshop. The steel is heat treated and passivated for corrosion resistance, then each instrument is checked by hand for action and finish.

Listed at $7.99, falling to $7.35 at 21 pieces - about 8% off the single-unit price. Larger quantities are priced on request.

Small trial orders are welcome — most buyers start with a sample or a single carton before committing.
